The seismic upgrades required for NPC 3 & 4 will include all architectural, mechanical, electrical systems, components and hospital equipment meeting the bracing and anchorage requirements of Part 2, Title 24. In addition as required by NPC 5, the Hospital will provide for onsite supplies of water and holding tanks for sewage and liquid waste, sufficient to support 72 hours of emergency operation, that are integrated into the plumbing systems for the Hospital's building in accordance with the California Plumbing Code. Also required by NPC 5, an onsite emergency electrical system shall serve all critical care areas and shall provide for radiological service. The onsite emergency generator fuel supply will provide for a minimum of 72 hours of acute care operations.
