

Bakersfield Heart Hospital, an Acute Care Inpatient Facility in Bakersfield, California (OSHPD Facility #17358) presently has been given an SPC-5 performance rating with an NPC-4 performance rating. While the SPC-5 performance rating complies with the Seismic Safety Regulations and Standards delineated in Section 130065, the Board of Directors for the Hospital has been informed of the purported NPC-4 performance rating and that an NPC-4 performance rating falls short of the seismic safety regulations or standards described in Health & Safety Code Section 130065. The Board of Directors is aware that the Hospital Building is required to meet the January 1, 2030 deadline for substantial compliance with the seismic safety regulations and/or standards described in Health & Safety Code Section 130065.
