

Agenda Item 9d: Primary Care Residency (PCR) Program Review Clarification of Payer Mix Data Collection

Hovik Khosrovian, Policy Section Manager
June 2020 Song-Brown Policy Meeting

Background

The program review identified inconsistencies with programs listing their payer mix data:

- Programs didn't understand how to report patient data.
- The program review recommended clarifying the application instructions on whether programs should report payer mix by patient encounters or unique visits.

Recommendation

The PCR Program Review subcommittee recommended updating the payer mix definition to request data based on unique visits.

Implementation Timeline

OSHDP staff will update the PCR application and glossary for the 2021 PCR application cycle.
