## INTRODUCTION

The Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 (HFSSA) preempts local jurisdictions from the enforcement of all building standards published in the Title 24, California Building Standards Code (CBSC) relating to the regulation of hospital buildings, acute psychiatric hospitals, skilled nursing facilities, intermediate-care facilities and under certain circumstances, some clinics as codified in the California Health and Safety Code (HSC). The Department of Health Care Accessibility and Access’s (HCAI) Office of Statewide Hospital Planning and Development (OSHPD) is designated as the enforcing agency for these health facilities, including plan checking during design and inspection while under construction of the architectural, structural, mechanical, plumbing, electrical, fire life safety, and low voltage systems. See OSHPD [CAN 2-0 OSHPD Jurisdiction](#). A new classification of supplemental service, OSHPD 6, was added during the 2022 Intervening Code Cycle, effective July 1, 2024.

**BACKGROUND**

Most chemical dependency recovery (CDR) services have historically been provided in freestanding facilities that were constructed under the local jurisdiction as Chemical Dependency Recovery Hospitals. However, CDR services may also be provided in a building under OSHPD jurisdiction as a distinct part or separate unit.

**INTERPRETATION**

OSHPD’s jurisdiction for Chemical Dependency Recovery Hospitals [OSHPD 6] shall be limited to such services when they are provided as a distinct part or separate unit within a building under its jurisdiction. For example, if the CDR service is provided in an OSHPD 1 or 5 building type, OSHPD would be the enforcing agency. However, the local jurisdiction is responsible for enforcement of freestanding Chemical Dependency Recovery Hospitals within their jurisdiction based on standards they determine to be applicable to the occupancy and use of the building and the requirements in Section 1229 of the California Building Code (CCR, Title 24, Part 2).
