

Continued Context Setting:  
*Federal and National Hospital Equity  
Measures and Standards*

Ignatius Bau, Health Equity Expert & HCAI Consultant

## Cross-Walk of Federal Government and National Hospital Equity Measures and Standards

Prepared for California Department of Health Care Access and Information  
Hospital Equity Measures Advisory Committee

Health Equity Topic	Centers for Medicare & Medicaid Services  Hospital Commitment to Health Equity Measure (Proposed)	Centers for Medicare & Medicaid Services  Hospital Screening for Social Drivers of Health Measures (Proposed)	Joint Commission  Health Care Disparities Reduction and Patient-Centered Communication Accreditation Standards	National Committee for Quality Assurance  Health Equity Accreditation Standards	National Committee for Quality Assurance  Health Equity Plus Accreditation Standards	U.S. Department of Health and Human Services Office of Minority Health  National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care
Engagement of Hospital Leadership	MUC 2021-106 Domain 5A: Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews our strategic plan for achieving health equity.		Standard LD.04.03.08: Reducing health care disparities for the [organization's] [patients] is a quality and safety priority.			Standard 2: Advance and sustain organizational governance and leadership that promotes CLAS and health equity through policy, practices, and allocated resources.

**TABLE IX.E-01. THE HOSPITAL COMMITMENT TO HEALTH EQUITY MEASURES FIVE ATTESTATIONS**

Attestation	Elements: Select all that apply (Note: Affirmative attestation of all elements within a domain would be required for the hospital to receive a point for the domain in the numerator)
Domain 1: Equity is a Strategic Priority	
<p>Hospital commitment to reducing healthcare disparities is strengthened when equity is a key organizational priority. Please attest that your hospital has a strategic plan for advancing healthcare equity and that it includes all the following elements.</p>	<p>(A) Our hospital strategic plan identifies priority populations who currently experience health disparities.            (B) Our hospital strategic plan identifies healthcare equity goals and discrete action steps to achieving these goals.            (C) Our hospital strategic plan outlines specific resources which have been dedicated to achieving our equity goals.            (D) Our hospital strategic plan describes our approach for engaging key stakeholders, such as community-based organizations.</p>
Domain 2: Data Collection	
<p>Collecting valid and reliable demographic and social determinant of health data on patients served in a hospital is an important step in identifying and eliminating health disparities. Please attest that your hospital engages in the following activities.</p>	<p>(A) Our hospital collects demographic information, including self-reported race and ethnicity and/or social determinant of health information on the majority of our patients.            (B) Our hospital has training for staff in culturally sensitive collection of demographic and/or social determinant of health information.            (C) Our hospital inputs demographic and/or social determinant of health information collected from patients into structured, interoperable data elements using a certified EHR technology.</p>

<b>Domain 3: Data Analysis</b>	
Effective data analysis can provide insights into which factors contribute to health disparities and how to respond. Please attest that your hospital engages in the following activities.	(A) Our hospital stratifies key performance indicators by demographic and/or social determinants of health variables to identify equity gaps and includes this information on hospital performance dashboards.
<b>Domain 4: Quality Improvement</b>	
Health disparities are evidence that high-quality care has not been delivered equally to all patients. Engagement in quality improvement activities can improve quality of care for all patients.	(A) Our hospital participates in local, regional, or national quality improvement activities focused on reducing health disparities.
<b>Domain 5: Leadership Engagement</b>	
Leaders and staff can improve their capacity to address disparities by demonstrating routine and thorough attention to equity and setting an organizational culture of equity. Please attest that your hospital engages in the following activities.	(A) Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews our strategic plan for achieving health equity. (B) Our hospital senior leadership, including chief executives and the entire hospital board of trustees, annually reviews key performance indicators stratified by demographic and/or social factors.

MUC2021-136	Screening for Social Drivers of Health	Percent of beneficiaries 18 years and older screened for food insecurity, housing instability, transportation problems, utility help needs, and interpersonal safety.
-------------	--	---

MUC2021-134	Screen Positive Rate for Social Drivers of Health	Percent of beneficiaries 18 years and older who screen positive for food insecurity, housing instability, transportation problems, utility help needs, or interpersonal safety.
-------------	---	---

The Joint Commission

# R<sup>3</sup> Report | Requirement, Rationale, Reference

A complimentary publication of The Joint Commission

Issue 36, Date June 20, 2022

Published for Joint Commission-accredited organizations and interested health care professionals, *R3 Report* provides the rationale and references that The Joint Commission employs in the development of new requirements. While the standards manuals also may provide a rationale, *R3 Report* goes into more depth, providing a rationale statement for each element of performance (EP). The references provide the evidence that supports the requirement. *R3 Report* may be reproduced if credited to The Joint Commission. Sign up for [email](#) delivery.

## New Requirements to Reduce Health Care Disparities

# R<sup>3</sup> Report Requirement, Rationale, Reference

A complimentary publication of The Joint Commission

Issue 1, February 9, 2011

**Published for Joint Commission accredited organizations and interested health care professionals, *R<sup>3</sup> Report* provides the rationale and references that The Joint Commission employs in the development of new requirements. While the standards manuals also provide a rationale, the rationale provided in *R<sup>3</sup> Report* goes into more depth. The references provide the evidence that supports the requirement. *R<sup>3</sup> Report* may be reproduced only in its entirety and credited to The Joint Commission. ## Question:

Can we create an objective, quantitative way to identify a hospital community's social vulnerability?

# Step 1 – Choose an Indicator of Disadvantage

---

**Healthy Places Index (HPI)**

---

**CDC Social Vulnerability Index (SVI)**

---

**Area Deprivation Index (ADI)**

---

**Social Deprivation Index**

---

**Poverty level**

---

**Household Income**

## CALIFORNIA HEALTHY PLACES INDEX

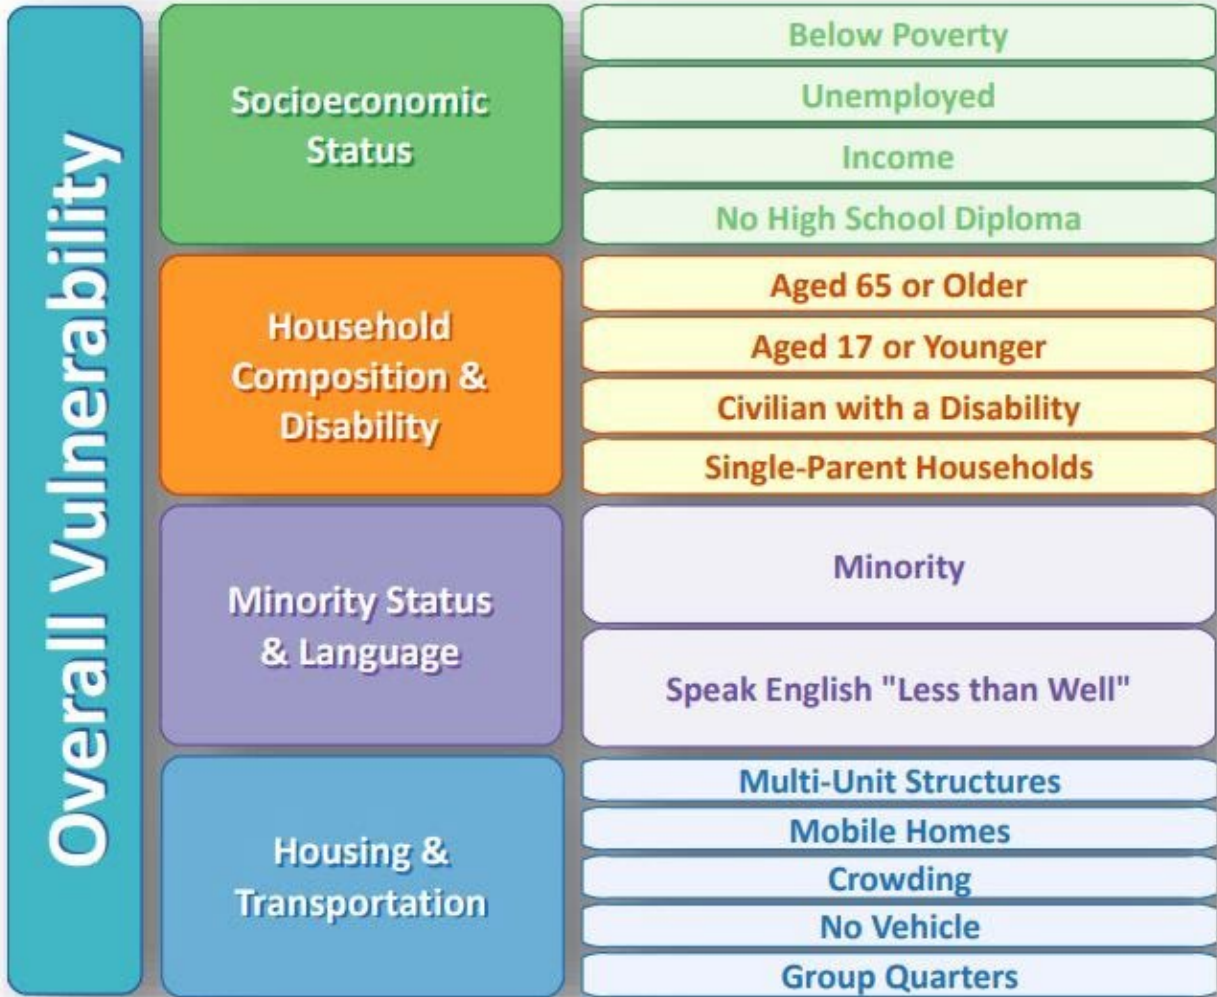

Twenty-three variables across eight domains constructed for life expectancy at birth (LEB) in California census tracts.

<u>Economic</u> 35%	<u>Education</u> 18%	<u>Transportation</u> 13%	<u>Social</u> 13%	<u>Housing</u> 5.3%	<u>Healthcare Access</u> 5.3%	<u>Clean Environment</u> 5.2%	<u>Neighborhood</u> 5.2%
<ul style="list-style-type: none"> <li>• Employed</li> <li>• Per Capita Income</li> <li>• Above Poverty</li> </ul>	<ul style="list-style-type: none"> <li>• In Pre-School</li> <li>• In High School</li> <li>• Bachelor's Education or Higher</li> </ul>	<ul style="list-style-type: none"> <li>• Automobile Access</li> <li>• Active Commuting</li> </ul>	<ul style="list-style-type: none"> <li>• Census Response Rate</li> <li>• Voting in 2020</li> </ul>	<ul style="list-style-type: none"> <li>• Low-Income Renter Severe Housing Cost Burden</li> <li>• Low-Income Homeowner Severe Housing Cost Burden</li> <li>• Housing Habitability</li> <li>• Uncrowded Housing</li> <li>• Homeownership</li> </ul>	<ul style="list-style-type: none"> <li>• Insured Adults</li> </ul>	<ul style="list-style-type: none"> <li>• Ozone</li> <li>• PM 2.5</li> <li>• Diesel PM</li> <li>• Water Contaminants</li> </ul>	<ul style="list-style-type: none"> <li>• Retail Density</li> <li>• Park Access</li> <li>• Tree Canopy</li> </ul>

**Health Places Index Policy Action Areas (Domains), Weights, and Individual Indicators**

CDC Social Vulnerability Index (SVI) Components

Step – 2  
Identify  
Patient  
Origin

**Hospital Service Areas (HSAs)** are local health care markets for hospital care. HSAs were defined by determining the ZIP codes of the patient origin for hospitalized based on calendar year.

- Primary Service Area
- Secondary Service Area

HCAI discharge data used to determine patient origin

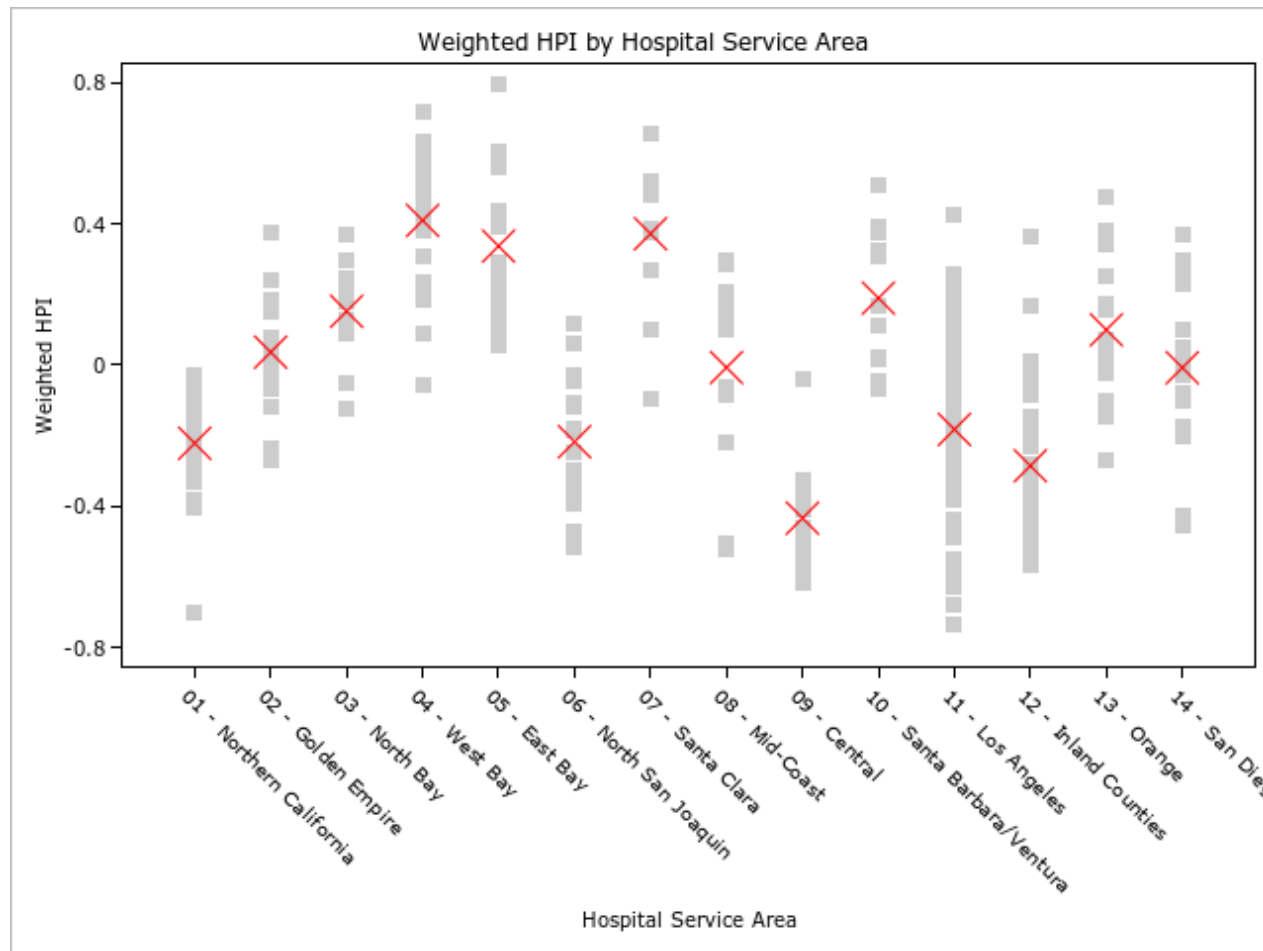

Step 3 - Map Indicator to Weighted Patient Origin (High Social Needs)

hosp_name	HPI All Payer	SVI All Payer
Martin Luther King, Jr. Community Hospital	-0.74	0.85
Adventist Health Clear Lake	-0.71	0.78
Community Regional Medical Center	-0.71	0.78
Community and Mission Hospital of Huntington Park -	-0.69	0.84
California Hospital Medical Center	-0.67	0.80
Delano Regional Medical Center	-0.65	0.86
Community Hospital of San Bernardino	-0.64	0.78
Kern Medical	-0.62	0.76
St. Bernardine Medical Center	-0.61	0.76
East Los Angeles Doctors Hospital	-0.60	0.81
Hemet Valley Medical Center	-0.59	0.73
St. Francis Medical Center	-0.59	0.81
Adventist Health White Memorial	-0.57	0.80
Adventist Health Reedley	-0.57	0.83
Bakersfield Memorial Hospital	-0.57	0.72
Victor Valley Global Medical Center	-0.55	0.68
Hi-Desert Medical Center	-0.55	0.60
Sierra View Medical Center	-0.54	0.87

Step 3 - Map Indicator to Weighted Patient Origin (Low Social Needs)

hosp_name	HPI All Payer	SVI All Payer
Seton Medical Center	0.44	0.42
Stanford Health Care	0.44	0.38
Kaiser Permanente South San Francisco Medical Cen	0.45	0.41
Kaiser Permanente San Francisco Medical Center	0.45	0.39
San Mateo Medical Center	0.46	0.40
Good Samaritan Hospital - San Jose	0.46	0.33
California Pacific Medical Center - Davies Campus	0.46	0.36
St. Mary's Medical Center - San Francisco	0.47	0.36
Los Robles Hospital & Medical Center	0.49	0.25
Mission Hospital - Mission Viejo	0.50	0.19
John Muir Medical Center - Walnut Creek Campus	0.54	0.31
Kaiser Permanente Redwood City Medical Center	0.54	0.35
Novato Community Hospital	0.55	0.31
Kaiser Permanente Walnut Creek Medical Center	0.55	0.29
Stanford Health Care - ValleyCare - Pleasanton	0.57	0.24
Mills-Peninsula Medical Center	0.59	0.33
El Camino Hospital	0.60	0.29
Sequoia Hospital	0.61	0.30
Kaiser Permanente San Rafael Medical Center	0.62	0.29
Marin General Hospital	0.68	0.28
San Ramon Regional Medical Center	0.80	0.17

# Variation in HPI Across and Within Major Market Geographic Regions

- Grey squares show general number of hospitals in Major Market
- “X” is the average hospital-level HPI in the HSA
- Substantial variation in average HPI across Major Market regions
- Also, substantial variation in hospital-level HPI within Major Market

# Which measures have the highest correlation with Hospital HPI score?

Breastfeeding Rate (CDPH)	0.57
Patients who reported that their doctors always communicated well	0.45
Would recommend hospital	0.45
Primary and Revision Hip Surgery Volume	0.34
Esophageal Resection - Number of Cases	0.32
Surgical Site Infections - Cardiac	0.28
Patients who reported that their nurses always communicated well	0.27
Primary and Revision Knee Surgery Volume	0.27
Pancreas Cancer Volume	0.27
Information and education	0.27
Patients who reported they understood their care when they left the hospital	-0.28
Rate of readmission after discharge from hospital (hospital-wide)	-0.31
Heart Failure Potentially Preventable Readmissions	-0.34
Abdominal Aortic Aneurysm Repair - Mortality Rate	-0.38
Surgical Site Infections - Kidney Transplant	-0.74

HCAHPS  
Measures

# Which measures aren't well correlated?

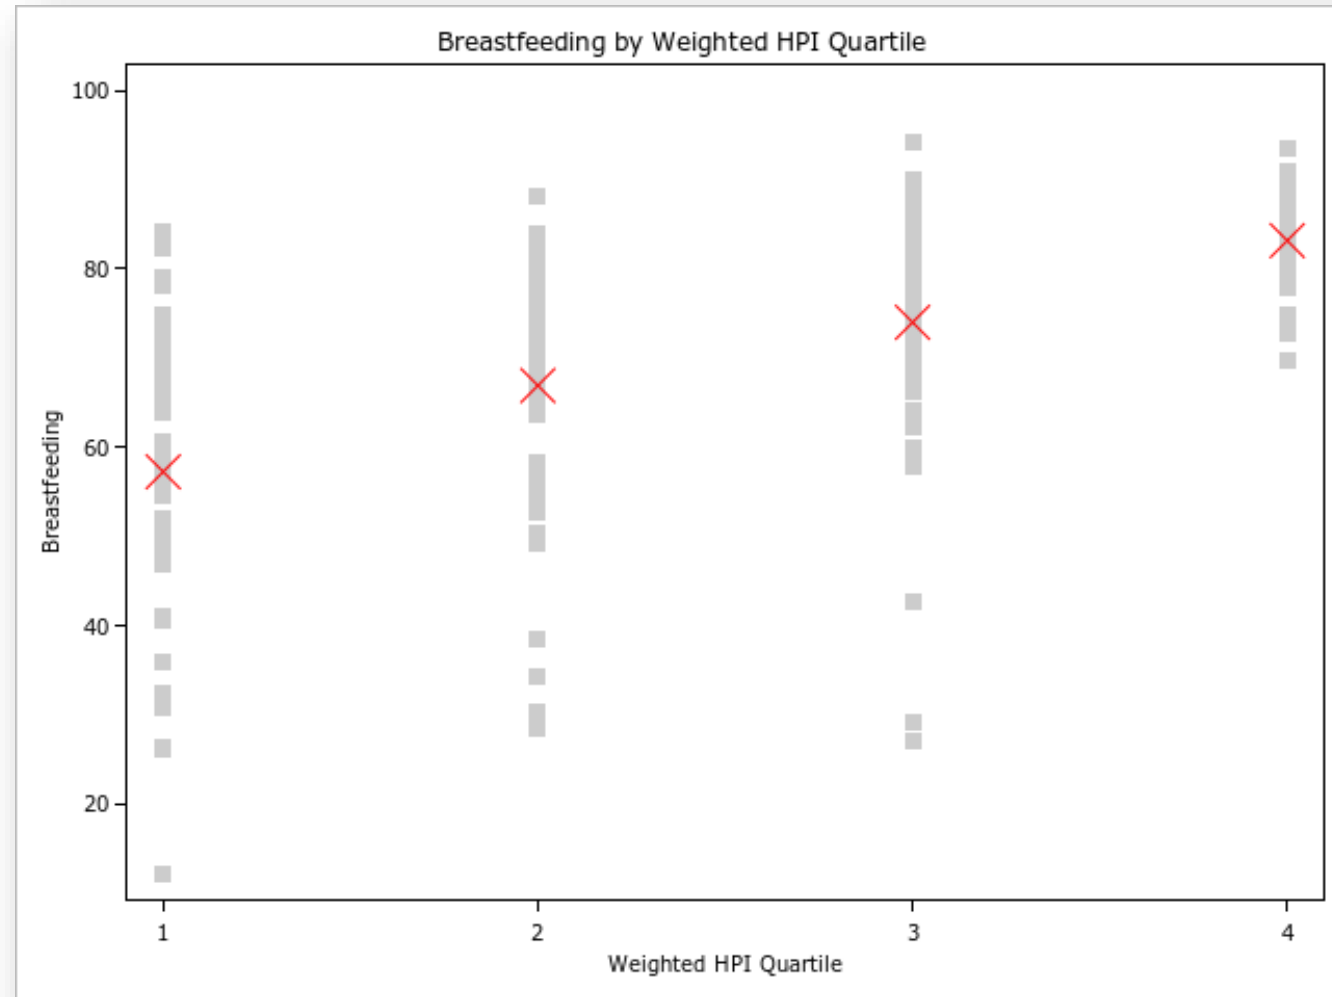

Summary Star Rating	0.00
Craniotomy Mortality Rate	0.00
Average minutes before outpatients with chest pain or possible heart attack got an ECG	0.00
Surgical Site Infections - Abdominal Aortic Aneurism Repair	0.00
Surgical Site Infections - CABG w/ Chest Incision Only	0.00
Surgical Site Infections - Spinal Refusion	0.00
Catheter-associated urinary tract infections (CAUTI) in ICUs and select wards	0.00
Surgical Site Infections - Bile Duct/Liver/Pancreatic	-0.02
Surgical Site Infections - Abdominal	-0.02
Percutaneous Coronary Intervention -Mortality Rate	-0.02
Healthcare workers given influenza vaccination	-0.03
Unplanned Surgical Wound Reopening	-0.05
Pancreatic Resection - Mortality Rate	-0.05
COPD Potentially Preventable Readmissions	-0.06
Pneumonia Death Rate	-0.06
NTSV C-Section Rate	-0.07

Five Hospitals account for 57% of patients

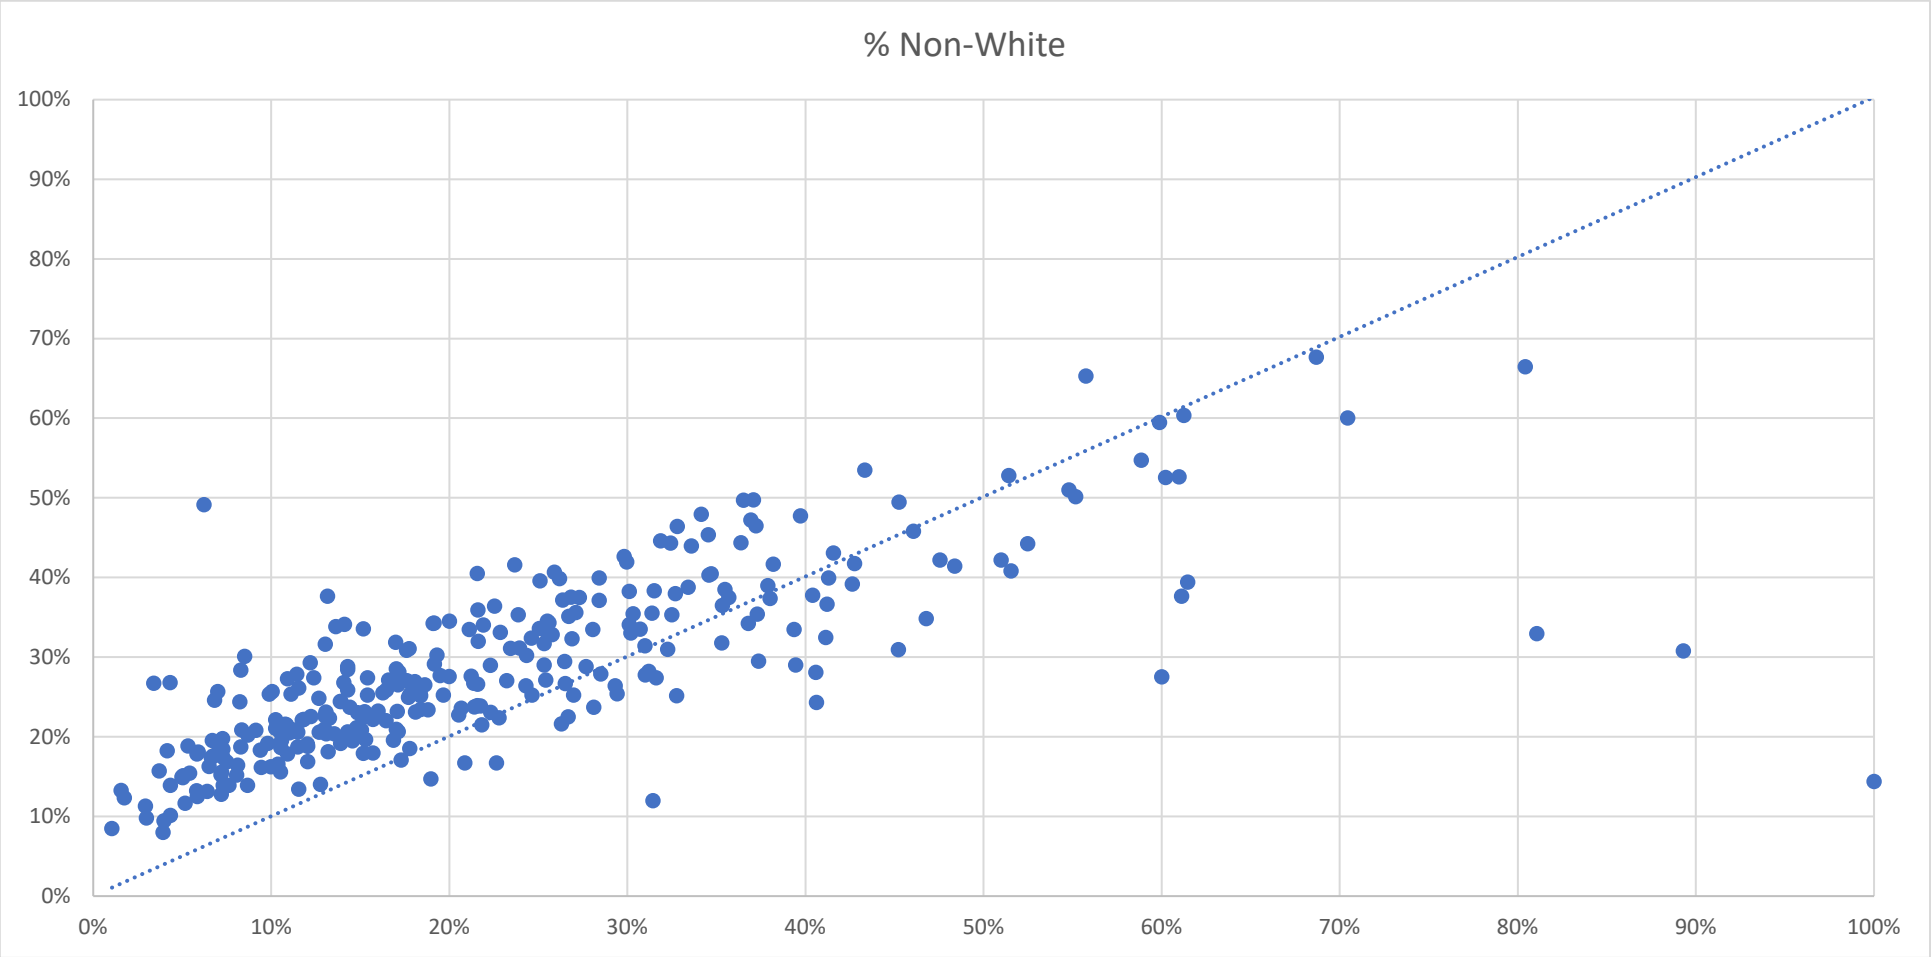

# Comparing Reported Race/Ethnicity with Expected: Discharge Data vs. ACS Data – Black

# Comparing Reported Race/Ethnicity with Expected: Discharge Data vs. ACS Data – Hispanic

# Comparing Reported Race/Ethnicity with Expected: Discharge Data vs. ACS Data – Non-white

# Lessons Learned (so far)

---

Profiling a hospital's community for social needs with publicly available data is possible

---

Social needs are complex and represent diverse challenges to reduce disparities

---

Some measures correlate with social needs, many measures don't

---

Targeting interventions to reduce disparities will require addressing local context

# Using Social Needs Index (SNI) Scores

---

Method to benchmark, validate and more precisely understand differing community needs

---

Objectively target communities for intervention

---

Better evaluate interventions for impact

---

Evaluate overlapping HSAs for collaborative efforts

---
