Favorite topics and other comments:

1. It was very helpful to hear ways that GC prefer to streamline their process
2. Importance of Owner involvement in the project throughout all phases
3. Overall "TEAM" mentality approach from everyone
4. Constructors role of QA/QC first, then Inspection
5. It was informative and inspiring to hear the same ideas rephrased from each shareholder's point of view. It was also good to see what are considered standard baseline expectations of each party within the process.

Favorite topics and other comments (cont'd):

6. The overlapping perspectives regarding team work incredibly validating...coming back to "we are a team and we want this project to successful" was a positive message.
7. Particularly interesting comments were: Owner engagement during construction and including IOR in the OAC
8. Recommendation to include IOR and any trade sub-contractors in the pre-construction meetings as soon as possible to foster familiarity with the design documents in service to delivery within scope and approved design documents
9. Hearing from each person representing their own perspective: HCAI, CO, GC, IOR
10. I am very happy to hear the consistent "Inspect to Pass" philosophy continues to be demonstrated in HCAI webinars. This helps reinforce to all project team members that this is very important/relevant on projects that HCAI fully supports and is very much in alignment w/continuous monitoring requirements of Title 24.
