

2024 Hospital Seismic Performance Report

AB 1882

AB 1882 Purpose – Services and Performance Ratings

Assembly Bill 1882 requires each general acute care hospital operator to annually report the structural and non-structural performance ratings for each individual hospital building used for providing care, and services housed in each. Hospital operators are responsible to provide their report to specific public entities and hospital stakeholders until seismic compliance is achieved for all buildings.

This document includes a brief explanation of Structural and Non-structural Performance Ratings, along with details about services offered by the hospital. Additionally, it outlines the specific entities and stakeholders to whom the facility is required to submit the report. Furthermore, the document contains the facilities' site plan, building numbers and names, and a comprehensive table detailing the ratings of acute care services housed within each building.

Structural and Non-structural Performance Ratings: The Structural Performance Category (SPC) of a hospital building, akin to bones and muscles in the human body, signifies its primary strength and stability, ranging from the strongest SPC-5 to the weakest SPC-1. Non-structural Performance Category (NPC), like organs in the human body, includes systems and equipment vital for daily operations, rated from functional NPC-5 to system risk to life NPC-1. Both SPC and NPC are crucial, collectively defining a hospital's effectiveness and quality of care.

Acute Care Services: General acute care services are grouped into four categories:

- Required clinical services: Nursing, Surgery, Anesthesia, Imaging, Laboratory, Pharmacy, Dietetic
- Required support services: Administration, Environmental Services, General Stores, Linen, Morgue
- Supplemental services – optional services requiring special licensure: Critical Care, Emergency, Pediatric, Psychiatric, Obstetric, Rehabilitation, Skilled Nursing, others
- Infrastructure – buildings that provide utilities and support circulation: Central Plants, canopies, corridor buildings, tunnels, skybridges

Report Distribution: Hospitals are required to issue reports to the following organizations and stakeholders:

- Local county board of supervisors
- Local city council, if applicable
- Any labor union representing employees working in buildings not fully conforming
- Special district or joint power agencies providing fire and emergency medical services district, if applicable
- Department of Health Care Access and Information
- Board of directors of the hospital
- Local office of emergency services or equivalent
- Office of Emergency Services
- Medical health operational area coordinator
