GENERAL

Business Name	Vitalant
Website	www.vitalant.org
Ownership Type	Corporation
Other Ownership	
Tax Status	For-profit
Federal Tax ID	86-0098929
Description of Submitting Organization	<p>Vitalant is an Arizona nonprofit corporation established in 1943, providing health systems and hospitals across the U.S. a safe blood supply, specialized laboratory services, transfusion medicine expertise and world-renowned research.</p> <p>Vitalant does not have any member owners. Vitalant's Board of Trustees retains sole governance oversight for the business and affairs of the corporation, including financial control, and is responsible for the conduct of the business and exercises all powers of the corporation.</p> <p>Vitalant has several wholly-owned subsidiaries and has three main service lines, detailed below.</p> <p>Vitalant's Blood Services collects over 1.6</p>

	<p>million blood, platelet, and plasma donations annually through about 60,000 blood donation opportunities. These donations are processed into over 2 million blood products and distributed to about 900 hospitals across the U.S.</p> <p>Vitalant’s Biotherapies Services performs about 1.4 million tests and 11,000 clinical procedures annually, and supports multiple ongoing research studies. The tests, procedures, and ongoing research provide critical support to hospitals and their patients across multiple specialties, including transfusion medicine, transplantation, and cellular therapy.</p> <p>The Vitalant Research Institute is dedicated to advancing blood safety worldwide through scientific research, education and the promotion of evidence-based policies.</p> <p>In addition to its blood collection, processing and distribution operations, Vitalant provides hospital and laboratory services to support health care practitioners who specialize in transfusion, transplantation and regenerative medicine through service arrangements entered into with fully integrated delivery systems and hospitals, not with individual health care practitioners. Vitalant does not provide any health care services directly to patients in the state of California, and does not bill patients or any third-party payers for services rendered in California.</p>
Health Care Provider	Yes
For Providers: Desc. of Capacity or Patients served in California	<p>While Vitalant owns and operates clinical laboratories within the state of California, all laboratory services are provided to health systems and hospitals under a fee-for-service arrangement in connection with its Blood Services operations and no such services are provided directly to patients.</p> <p>Vitalant owns or leases thirty-three (33) facilities in California and has 724 active employees in California as of December 2025. These facilities serve as blood donation centers, mobile staging centers,</p>

	<p>manufacturing centers, laboratories, warehouses, office buildings and/or distribution centers. Any facilities that serve as donation centers, laboratories, or manufacturing and distribution centers are registered with the U.S. Food and Drug Administration (“FDA”). These facilities are located in Alameda, Butte, El Dorado, Merced, Napa, Nevada, Placer, Sacramento, San Francisco, San Luis Obispo, San Mateo, Santa Barbara, Shasta, Solano, Sonoma, Sutter, Ventura, and Yolo counties. See ATTACHMENT - LIST OF CA FACILITIES.</p> <p>In 2025, Vitalant provided products and services to 132 California-based healthcare customers directly as a full-service or secondary supplier, or through a subcontract relationship with another blood center partner with a physical presence in the area to help Vitalant serve the customer. More specifically, in 2025, Vitalant is projected to supply the following estimated number of products and services in California:</p> <ul style="list-style-type: none"> - 10k units of cryoprecipitate - 52k units of plasma - 1.6k units of plasma for further manufacturing - 62k units of platelets - 221k units of red blood cells - 88k laboratory services. <p>Annual revenue for the three most recent fiscal years used in calculating revenue in accordance with section 97435(d):</p> <p>2023: \$110,819,919 2024: \$117,177,176 2025 YTD Nov: \$118,610,279</p>

California licenses and numbers	<p>See Attachment 11 – Vitalant CA Licenses List. The list includes the facilities that hold Medical Waste and Hazardous Waste permits and/or licenses within California. All of these applicable permits or licenses are renewed annually by Vitalant’s operational sites following inspection in accordance with the state’s requirements.</p> <p>See also Attachment, 11 – Vitalant List of California Facilities, which includes the FDA Blood Establishment Registration numbers and AABB accreditation numbers for the facilities that hold them.</p> <p>Additionally, Vitalant has an active registration, in good standing, with the California Secretary of State as an out-of-state nonprofit corporation.</p>
Other States Served	<p>AL; AR; AZ; CO; GA; ID; IL; LA; MA; MD; MN; MS; MT; ND; NE; NH; NJ; NM; NV; NY; OH; OR; PA; RI; SD; TN; TX; UT; WA; WV; WY</p>
Other state(s) licenses and numbers	<p>All Vitalant facilities are registered in the federal Blood Establishment Registration Database, which is required for facilities involved in the manufacture, distribution or testing of FDA-regulated products. Certain Vitalant facilities are also registered in the federal Human Cell and Tissue Establishment Registration Database, which is required for facilities involved in the manufacture of human cells, tissue and cellular and tissue-based products.</p> <p>Depending on the types of facilities operated in each state, Vitalant maintains all applicable state licenses, permits, certificates and/or registrations including Clinical Laboratory, Biologics, Donor Center, Blood Bank, Hazardous/Medical Waste, X-Ray/Irradiation and all other required state licenses, permits, certificates and/or registrations.</p>

	Additionally, Vitalant facilities maintain all appropriate accreditations and certifications from industry organizations, including the Association for the Advancement of Blood and Biotherapies (“AABB”), the Foundation for Accreditation of Cellular Therapy (“FACT”), the American Society for Histocompatibility and Immunogenetics (“ASHI”) and Clinical Laboratory Improvement Amendments (“CLIA”) certifications.
Primary Languages used when providing services	English
Other language if not listed above	Vitalant does not provide services directly to Medi-Cal beneficiaries.

San Diego Blood Bank d/b/a Southern California Blood Bank	Blood Services, Lab and Clinical Services, Donor Recruitment and Community Outreach, Support for Medical Research	Corporation	Yes

CRITERIA

A health care entity with annual revenue, as defined in section 97435(d) , of at least \$25 million or that owns or controls California assets of at least \$25 million, or;	Yes
A health care entity with annual revenue, as defined in section 97435(d) , of at least \$10 million or that owns or controls California assets of at least \$10 million and is a party to a transaction with any health care entity satisfying subsection (b)(1), or	Yes
A health care entity located in a designated primary care health professional shortage area in California, as defined in Part 5 of Subchapter A of Chapter 1 of Title 42 of the Code of Federal Regulations (commencing with section 5.1), available at data.hrsa.gov . To determine if you are located in a primary health care professional shortage area, please visit here	No

CIRCUMSTANCES FOR FILING

The proposed fair market value of the transaction is \$25 million or more and the transaction concerns the provision of health care services.	Yes
The transaction involves the sale, transfer, lease, exchange, option, encumbrance, or other disposition of 25% or more of the total California assets of the submitter(s).	Yes
<p>The transaction involves a transfer or change in control, responsibility or governance of the Submitter. A transaction will directly or indirectly transfer control, responsibility, or governance in whole or in part of a material amount of the assets or operations of a health care entity to one or more entities if:</p> <p>(1) The transaction would result in the transfer of 25% or more of the voting power of the members of the governing body of a health care entity, such as by adding one or more members, substituting one or more members, or through any other type of arrangement, written or oral; or</p> <p>(2) The transaction would vest voting rights significant enough to constitute a change in control such as supermajority rights, veto rights, and similar provisions even if ownership shares or representation on a governing body are less than 25%;</p>	Yes

TRANSACTION DETAILS

Anticipated Date of Transaction Closure	3/30/2026
Description of the Transaction	See Attachment 11 - Vitalant Description of Transaction.
Submitted to US Department of Justice or Federal Trade Commission?	No
Submitted to Other Agency?	No
Subject to court proceeding	No
Description of current services provided and expected post-transaction impacts on health care services	Neither Vitalant nor SDBB provide health care services directly to patients in the state of California. Vitalant operates a network of blood donation centers across the U.S. and works with hospitals and health systems to ensure a safe blood supply. Vitalant also provides specialty laboratory services, has a bench strength of transfusion medicine expertise, and makes substantial investments into research and innovation. Vitalant currently operates twenty-five (25) donor centers and four (4) laboratories in the Central Coast and Northern California. See Attachment 11 - Vitalant List of CA Facilities. Vitalant's thirty-three (33) total facilities in California serve as blood donation centers, mobile staging centers, manufacturing centers, laboratories, warehouse or storage,

	<p>office buildings, and/or distribution centers. SDBB provides Southern California regional hospitals with a wide range of blood services, including blood collection, component manufacturing, plateletpheresis, plasmapheresis, leukapheresis, autologous storage, and reference laboratory services.</p> <p>Post-transaction, both Vitalant and SDBB will continue to operate in the ordinary course. The transaction is not expected to result in changes to SDBB's business plan or operations. Vitalant's role as the sole corporate member of SDBB post-transaction will be to expand SDBB's reach through access to Vitalant's national, extensive blood product inventory and network, capital resources, and specialty laboratory network. Any post-transaction impacts will be to enhance the ability of both Vitalant and SDBB to meet the current and future blood supply needs of their customers. Vitalant does not anticipate any major changes or limitations to the areas currently being served by SDBB in Southern California due to the transaction.</p> <p>As mentioned throughout the notice application, neither Vitalant nor SDBB provide health care services directly to patients in California with the exception of accepting voluntary blood donations, and distributing processed blood products and related services to hospitals. Neither Vitalant nor SDBB anticipates any post-transaction changes that would impact the number or type of patients that are currently served by its integrated delivery system and hospital customers that contract with Vitalant or SDBB to provide blood and blood-related services to their facilities.</p> <p>Given that neither Vitalant nor SDBB bill patients for services rendered in the state of California, there will be no impact of the transaction on Medi-Cal or Medicare patients or charity care or community benefit programs.</p>
<p>Prior mergers or acquisitions that: (A) involved the same or related health care services;</p>	<p>See Attachment 11 - Vitalant Prior Mergers or Acquisitions.</p>

<p>(B) involved at least one of the entities, or their parents, subsidiaries, predecessors, or successors, in the proposed transaction; and (C) were closed in the last ten years.</p>	
<p>Description of Potential Post Transaction Changes</p>	<p>See Attachment 11 - Vitalant Post Transaction Changes.</p>
<p>Description of the nature, scope, and dates of any pending or planned material changes occurring between the Submitter and any other entity, within the 12 months following the date of the notice</p>	<p>Other than the transaction that is the subject of this filing, there are no additional material changes planned between Vitalant and any other entity domiciled or operating in the state of California.</p>

Description of the transaction [§ 97438(b)(5)]

(a) Goals of the transaction

Vitalant views this transaction as a substantial opportunity to build on SDBB's current, local strengths with Vitalant's national reach to enhance service to the Southern California communities. Together, the organizations can enhance blood supply resiliency, expand access to specialized laboratory services, support innovation in blood services and emerging therapies, and be better positioned to respond to evolving healthcare needs across Southern California. SDBB has a talented and experienced leadership team, access to many health and life science companies in the San Diego market, and a strong and committed blood donor base. In all, the partnership opens the door to many opportunities for Vitalant and SDBB to collaborate and enhance the quality, innovation, and breadth of services provided to the healthcare communities in Southern California.

(b) Summary of the terms of the transaction

As set forth in more detail in the Corporate Member Transaction Agreement ("Agreement"), as of the closing date, Vitalant will become the sole corporate member of SDBB. SDBB will then be operated by Vitalant initially as a wholly owned subsidiary. As of the close of the transaction, the SDBB Board of Directors ("SDBB Board") will be reconstituted with representatives from both the Vitalant Board of Trustees and the current SDBB Board to help oversee a seamless transition and integration before SDBB is merged into Vitalant at a later date.

(c) Statement of why the transaction is necessary or desirable

Vitalant does not currently have physical operations in Southern California, in SDBB's service area. Any services that Vitalant currently provides in San Diego County are through a subcontract with SDBB (see details below). Its closest facility is located in Ventura in the Central Coast. This transaction serves as a substantial opportunity for partnership between established blood centers to enhance blood supply resiliency, expand access to specialized laboratory services, support innovation in blood services and emerging therapies, and be better positioned to respond to evolving healthcare needs of hospitals and patients throughout California.

Because Vitalant does not currently have a reference laboratory in Southern California, Vitalant has entered subcontract relationships with regional blood service providers (including SDBB) to help provide full services in a cost-effective manner to an integrated delivery system with hospital facilities in Southern California. This is in response to the general desire by integrated delivery systems to engage a sole or primary blood services supplier as part of their strategic approach. This practice from the systems' standpoint is intended to enhance patient safety, promote operational reliability, strengthen supply chain resilience through a national reach, and achieve financial sustainability through volume-based pricing. Additionally, working with a single or primary source supplier that is capable of providing full services to all of the hospitals within the integrated delivery system streamlines the system's administrative processes associated with contract management, billing and coding, inventory management, cybersecurity, and compliance with FDA, AABB, and other state regulations. In addition to San Diego County, the customer accounts in Fresno, Los Angeles and San Bernadino are also served through a subcontract relationship.

(d) General public impact or benefits of the transaction, including quality and equity measure and impacts

Vitalant will bring its 83-year history of successful operations, along with resources and innovation that comes with it, to the Southern California community. This partnership allows current customers of SDBB access to extended laboratory service offerings, cell and gene therapy products and services, as well as globally renowned research, innovation and advocacy. Additionally, it gives current customers of SDBB access to an extensive, nationwide blood supply, providing enhanced stability and business continuity to the health systems and hospitals located in Southern California. The Agreement sets forth the parties' desire to ensure continuity in the current services offered by SDBB during the transition. Doug Morton, SDBB's Chief Executive Officer ("CEO") will remain the CEO of SDBB to support the transition and integration activities, and SDBB will also continue to leverage its existing Community Advisory Committee to advance Vitalant and SDBB's shared mission of promoting the charitable operation of blood-related services.

(e) Narrative description of the expected competitive impacts of the transaction; and

This transaction is expected to have procompetitive benefits. Vitalant does not currently maintain operations in SDBB's service area. Thus, this transaction gives Southern California hospitals, health systems, and patients, access to new services and products that SDBB does not currently offer. Additionally, the transaction will enhance competition, especially with regard to innovation, with other blood centers that operate in the community, given Vitalant's ability to offer a wider range of high-quality products and services and its investment in research and innovation. These offerings will supplement the current services offered by SDBB to its community partners.

(f) Description of any actions or activities to mitigate any potential adverse impacts of the transaction on the public.

The parties do not anticipate that the transaction will cause any adverse impacts to the public.

Potential post transaction changes [§ 97438(b)(10)]

(a) Ownership, governance, or operational structure of the submitter and parties to the transaction

There will be no post-close changes to Vitalant's ownership, governance, or operational structure. As a result of the transaction, Vitalant will become the sole corporate member of SDBB. As of the close of the transaction, the SDBB Board will be reconstituted as a seven (7) member board with (i) four (4) representatives appointed from the current Vitalant Board and (ii) three (3) representatives appointed from the current SDBB Board (collectively, the "Reconstituted SDBB Board"). This Reconstituted SDBB Board will remain in place for eighteen (18) months and will be charged with overseeing the transition.

Initially, SDBB will remain a separate 501(c)(3) organization. That could change if the Vitalant Board elects, after a period of approximately 18-months from the close of the transaction, to merge SDBB into Vitalant to gain additional efficiencies and subsequently operate SDBB as part of its Blood Services operations for Southern California. At that point, SDBB would cease to separately exist and all of the rights, privileges, immunities, powers, assets, liabilities and obligations of SDBB would vest in Vitalant as an operation of law. Vitalant does not anticipate material post-closing changes to SDBB's operational structure as Vitalant intends to continue to provide and grow SDBB's pre-closing services post-close.

(b) The submitter's employee staffing levels, job security, retraining policies, wages, benefits, working conditions and/or employment protections;

Vitalant does not anticipate any post-transaction changes to its own staffing levels, job security, retraining policies, wages, benefits, working conditions and/or employment protections due to the transaction with SDBB. Current SDBB employees will become employees of a Professional Employment Organization ("PEO") as of January 1, 2026 before the close of the transaction and Vitalant will work to develop an integration plan, including an onboarding plan, for those employees upon expiration of the PEO contract. Additionally, as part of the onboarding plan, Vitalant plans to credit all SDBB employees for their respective years of service with SDBB (including their time of service as employees of the PEO) for purposes of calculating years of service to determine eligibility for any benefits that are based on tenure within Vitalant.

(c) City or county contracts regarding the provision of health care services between the parties to the transaction and cities or counties; and

There will be no post-transaction changes to any applicable city or county contracts held by either Vitalant or SDBB as a result of the transaction, absent any compliance issues.

(d) If the submitter is a provider, comparable health care services currently offered by other health care entities within 20 miles of any location where the submitter offers health care services.

While Vitalant and SDBB offer clinical laboratory services, these services are not offered directly to patients. Any laboratory offerings are associated with the services Vitalant and SDBB provide to integrated delivery systems and hospitals in connection with delivery of blood products and related services. This transaction will not impact blood services or clinical laboratory offerings of other entities.
