

Suggested Educational Topics

Inspection Services Unit:

1. TIO Update: Latest Changes and Observed Conditions
2. OWNER, IOR, DPOR, GC, LAB: Personal Knowledge, Duties, and Responsibilities During Construction
3. Construction Documents Required: Forms, Notices, and other Documents
4. Quality Assurance Best Practices
5. Emergency Projects and Other Field Observed Conditions

Building Standards Unit:

1. How to work with OSHPD – spin-off of Tips from the Experts – Process from A to Z
2. Project review timelines and expectations. OSHPD fee review for purposes of budgeting project.
3. OSHPD 3
4. Skilled Nursing Facilities
5. Psychiatric Hospitals
6. Integrated Review PIN 50
7. California Administrative Code and OSHPD
8. Accessibility in Healthcare
9. Temporary Structures and Uses CAN 2-108
10. Amended Construction Documents – the Ins and Outs – CAN 2-107.4 and CAN 1-7-153(a)
11. Emergency Design Guide (*when ready*)

Fire Prevention Unit:

1. What is required when performing a fire alarm test
2. OSHPD standard on fire suppression in mdf/idf - clean agent system vs sprinkler system; FLS for technology rooms (*Not enough for a whole webinar, unless it is a 15-minute option*)
3. Fire pump requirements: Fire pump for high rise and non-high rise facilities
4. Fire separations and seismic separation requirements of 1 to 1R buildings
5. Location requirements for fire dampers, smoke dampers and combination dampers; Smoke mitigation with respect to mechanical

Structural Services Section:

1. Structural provisions & changes
2. Non-Structural Performance Categories
3. Structural: anchorage what's required calculation and what's not required
4. Dynamic Testing for Isolators, seismic field testing
5. OSP: process, requirements, and equipment anchorage
