Edit Flag Description Guide

EMERGENCY DEPARTMENT and AMBULATORY SURGERY DATA

December 2023 Version 32

State of California Department of Health Care Access and Information (HCAI) Patient Data Section 2020 West El Camino Avenue Sacramento, CA 95833 (916) 326-3935

SUMMARY OF CHANGES VERSION 32

Effective with encounters on and after January 1, 2024 (January - March 2024 Report Period)

AGE/SEX EDIT TABLES (pages 22-32)

Updated ICD-10-CM Diagnosis and ICD-10-PCS Procedure codes.

I INTRODUCTION

There are currently four (5) edit programs applied to Emergency Department and Ambulatory Surgery encounter data. A facility's data are processed through the following edit programs:

Transmittal Validation Standard Edit Program Duplicate Records Edit Program Trend Edit Program Comparative Edit Program

Each record is edited, and any errors found within the record are identified by edit flags.

These edit programs have been developed to promote reliable, accurate, and quality data.

This guide provides detailed information about each edit program, the applicable Error Tolerance Levels, and a list of the edit flags and their descriptions.

II EDIT PROGRAMS AT-A-GLANCE

UNDERSTANDING THE EDIT PROGRAMS

Your data will be rejected if it fails any of the edit programs described below.

"Fail" means your data is not at or below the established Error Tolerance Level (ETL).

Understanding these edit programs and the reasons your data might fail are very important when determining the best way to correct errors.

If your data fails the Transmittal Validation, it will be rejected and will not be processed through the remaining edit programs.

Program	Description	Likely Cause of Failure
Transmittal Validation	 Checks for proper file format and compares the "Expected" (based on the Transmittal Page information) to "Actual" data submitted. Incorrect file format One (1) or more records are reported with a Service Date that is blank, invalid, or outside the Report Period. Incorrect Facility ID Number on one or more records Abstract Record Number equals Social Security Number 	Your data did not pass one or more of the transmittal validations
Trend Edit (T flag)	This edit program compares the data in the current report period to the facility's historical data to identify uncharacteristic increases or decreases in percentages reported for certain data elements/categories.	Your data caused the program to generate one or more Critical Trend flags
Comparative Edit (C Flag)	Based on the TOTAL records reported, checks for reasonable distribution of categories within each data element for the Current Report Period. <u>EXAMPLE</u> : If 100% of your records are reported as Expected Source of Payment-Other, this program will generate a Comparative Edit flag and your data will fail.	Your data caused the program to generate one or more Comparative Edit flags
Standard Edit (S flag)	Checks for data entry errors and inconsistencies of data reported within each record. <u>EXAMPLE</u> : Date of Birth is after the Service Date	More than 2% of your records contain standard edit errors
Duplicate Records Edit (D Flag)	This edit program evaluates data for possible duplicate records by comparing data elements between each record reported.	More than 2% of your records contain duplicate records edit errors

III TRANSMITTAL VALIDATION

OVERVIEW

Transmittal Validation checks for proper file format, blank and invalid service dates, incorrect facility ID numbers, and Abstract Record Numbers that are the same as Social Security Numbers.

Error Tolerance Level: Data must pass both levels of validation before continuing through the remaining edit programs.

How do I know if my data failed Transmittal Validation?

Access the "Report Validation Summary" in the Report Dashboard to see if your data passed or failed Transmittal Validation. If the data failed Transmittal Validation, the Summary will display the error message(s) and record number(s) that contain the error.

- Up to 20 records are listed.
- If there more than 20 records with a transmittal error, then the following message will be displayed: There are more than 20 records with a transmittal error. Only the first 20 records are listed.

<u>To access the Report Validation Summary</u>: Click on the appropriate data type and report period on the Home screen.

Data will be rejected if it fails one or more of the following edits. Data must pass Transmittal Validation before continuing on to the remaining edit programs.

- Incorrect File Format
- Blank and Invalid Service Dates
- Incorrect Facility ID Number
- Abstract Record Number equals Social Security Number

TRANSMITTAL ERROR MESSAGES

Transmittal Edit	Error Message (Displayed on Main Error Summary)		
To easily locate the error(s) in the file, the Report Validation Summary will display the Record Number(s) that contain a transmittal error. Up to 20 records are listed.			
Incorrect File Format	Record length is less than 583 bytes.		
Records with Service Dates outside the Report Period	One or more records are reported with a Service Date that is blank, invalid, or outside the Report Period.		
Incorrect Facility ID Number	Incorrect Facility ID Number reported on one or more records.		
Abstract Record Number equals SSN	Abstract Record Number is the same as Social Security Number on one or more records		

IV TREND EDIT PROGRAM

OVERVIEW

The Trend Edit Program is designed to check for inconsistencies in data by comparing data submitted in the current report period to data submitted in the last two (2) (historical) report periods. If the <u>difference</u> between the current data and the historical data is more than a specified percentage, then a T (critical) or TW (non-critical) flag is applied to that data element or data element category. The facility must review any critical T flags in the data and verify whether or not the data is correct as reported.

Data will fail the Trend Edit Program if one or more Critical Trend Flags (T) are identified in the data.

Please see next page for a list of the Trend Edit Flags and their descriptions.

The Trend Edit Program will <u>not</u> apply edits to a data element if:

- A data element in the current report period has a Modification or Variant Action and trend rules have been turned off.
- The current report period is less than 60 days. Conversely, an historical report period that is less than 60 days will not be used for trend analysis.
- There is no historical data for the facility (e.g., new facility)
- The four (4) historical report periods have a Modification or Variant Action on the data element that is being "trended" and the associated trend rules have been turned off.

How do I know if my data failed the Trend Edit Program?

Check the "Report Validation Summary" in the Report Dashboard to see if your data passed or failed the Trend Edit Program. The Summary will display either "Pass" or "Fail" for this edit program. For "Fail" status, the Summary also displays the number of trend edit flags identified in the data.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

DEFINITIONS AND REPORTS

Critical Trend (T) Flag

A "T" flag, followed by a 3-digit number, identifies a Critical Trend Edit Flag.

A T-flag will result when the current data fails the Trend Edit in <u>both</u> historical report periods or it fails the Trend Edit against the only available historical report period. The affected data element category will receive the applicable T-Flag.

Trend Warning (TW) Flag (Non-Critical Error)

A "TW" flag, followed by a 2-digit number, identifies a Warning (Non-Critical) Trend Edit Flag. A TW-flag will **not** cause the data to be rejected. A TW-flag will result when the current data fails the Trend Edit in one historical report period and passes the Trend in the second historical report period. These flags are "warnings" that alert the facility to review possible errors in the data.

Trend Edit Summary Report

This report identifies the data element categories that have been flagged with a T or TW flag. This report includes the percentage or number of records reported in a data element for the Current Report Period; and the percentage or number in the historical report period(s) for the same data element.

<u>To access this report</u>: From the "Report Validation Summary" of the Report Dashboard, click on "Summary" in the Trend Edits section. You can print and/or save this report.

Data Distribution Report

This report displays each data element and lists the numerical and percentage breakdown of records within each data element category. Use this report to compare the data element categories that have been flagged with a "T" or "TW" flag to those categories (within the same data element) that were not flagged. It also may be useful to compare the "current" Data Distribution Report to "historical" Data Distribution Report(s) and look for any questionable increases or decreases in data element categories.

<u>To access this report</u>: From the "Other Report Information" section of the Report Dashboard, click on "Data Distribution Report (DDR)". You can print and/or save this report. Use the Data Distribution Report, in conjunction with the Trend Edit Summary Report, to help you determine if data is in error or is correct as reported.

TREND EDIT FLAGS AND DESCRIPTIONS

Critical Flags are identified as a T flag Warning (Non-Critical) flags are identified as a TW flag

Trend Edit Flag	Description
T005	The total number of records submitted (for the current report period) <u>decreased</u> more than 20%, when compared to your facility's historical data.
TW05	The total number of records submitted (for the current report period) <u>decreased</u> more than 20%, but data failed one historical report period and passed one historical report period.
T006	The total number of records submitted (for the current report period) <u>increased</u> more than 20%, when compared to your facility's historical data.
TW06	The total number of records submitted (for the current report period) <u>increased</u> more than 20%, but data failed one historical report period and passed one historical report period.
TW16	Average Total Charges decreased more than 20%
TW17	Average Total Charges increased more than 20%
TW18	Race decreased more than 20%
TW19	Race increased more than 20%
TW20	Total number of records with multiple races reported decreased more than 20%
TW21	Total number of records with multiple races reported increased more than 20%
TW22	Ethnicity decreased more than 20%
TW23	Ethnicity increased more than 20%
TW24	Ethnicity-Race decreased more than 20%
TW25	Ethnicity-Race increased more than 20%

V COMPARATIVE EDIT PROGRAM

OVERVIEW

The Comparative Edit Program evaluates data for "reasonable" distribution of data within each data element category for the current report period. If the percentage reported is greater than expected, then the data element category will fail the Comparative Edit. Comparative Edits are not applied to Blank or Invalid data.

Comparative Edits are a "fixed" percentage that applies to all facilities regardless of size.

A C-Flag, followed by a 3-digit number, identifies critical Comparative Edits.

Data will fail the Comparative Edit Program if one or more critical Comparative Edit Flags are identified in the data.

How do I know if my data failed the Comparative Edit Program?

Check the "Report Validation Summary" in the Report Dashboard to see if your data passed or failed the Comparative Edits. The Summary displays either "Pass" or "Fail" for this edit program. For "Fail" status, the Summary also displays the number of comparative edit flags identified in the data.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

DEFINITIONS AND REPORTS

Critical Comparative (C) Flag

A "C" flag, followed by a 3-digit number, identifies a Critical Comparative Edit Flag. A C-flag will result when the percent of data reported within a particular data element category is greater than expected. The affected data element category will receive the applicable C-Flag.

Comparative Warning (CW) Flag (Non-Critical Error)

A "CW" flag, followed by a 2-digit number, identifies a Warning (Non-Critical) Comparative Edit Flag. **A CW-flag will NOT cause the data to be rejected.** These flags are "warnings" that alert the facility to review possible errors in the data.

How does the system determine if a data element category failed a Comparative Edit?

- Based on the total records reported, the system calculates the percentage of records reported in a data element category. If the reported data is greater than expected, then a C-flag is applied to that data element category.
- The Comparative Edit Summary Report displays all the data element categories that have been flagged with a C flag.

Example of a Comparative Edit that is based on a fixed percentage:

C015: All records (100%) are reported in one data element category for Disposition of Patient.

If a facility reports 100% of their records as Disposition of Patient-'Other', then the data will receive a C015 flag.

Comparative Edit Summary Report

This report identifies the data element categories that have been flagged with a C flag. The report is in alphabetical order by data element and includes the data element category; percentage of records reported (Current Report Period); and the corresponding C flag.

<u>To access this report</u>: From the "Report Validation Summary" of the Report Dashboard, click on "Summary" in the Comparative Edits section. You can print and/or save this report.

Data Distribution Report

This report displays each data element and lists the numerical and percentage breakdown of records within each data element category. Use this report to compare the data element categories that have been flagged with a "C" flag to those categories (within the same data element) that were not flagged.

<u>To access this report</u>: From the "Other Report Information" section of the Report Dashboard, click on "Data Distribution Report (DDR)". You can print and/or save this report.

Use the Data Distribution Report, in conjunction with the Comparative Edit Summary Report, to help you determine if data is in error or is correct as reported.

Report by Selected Data Element (custom report)

When reviewing the Comparative Edit Summary Report, you may need to review records associated with a Comparative Edit Flag. For example, Expected Source of Payment-Other has a C017 flag— "All records (100%) are reported in one Expected Source of Payment category". In order to correct these records, it would be helpful to generate a report that lists all records reported as Expected Source of Payment-Other.

To generate a report by Selected Data Element, refer to the "Other Report Information" section of the Report Dashboard and click on "Selected Data Element Report". You can select the appropriate data element(s) and filter criteria. This custom report (all records reported as Expected Source of Payment-Other, sorted by Abstract Record Number) can be generated and saved. It can then be accessed by the facility and used for Comparative Edit error analysis.

NOTE: *If it is determined that the current data submitted is accurate, please contact your HCAI Analyst to explain.*

CRITICAL COMPARATIVE EDIT FLAGS AND DESCRIPTIONS

Comparative Edit Flag	Description
C001	All records are reported in one Sex category: Male or Female.
C003	The percentage of records reported with Unknown Sex is greater than 0.1%.
C004	All records are reported in one Ethnicity category.
C005	The percentage of records with Ethnicity-Unknown is greater than 10%
C006	All records are reported in one Race category.
C007	The percentage of records with Race-Unknown is greater than 10%
C008	The percentage of records with Partial ZIP Codes is greater than 2%
C009	ED Data: The percentage of records with Unknown ZIP Code (XXXXX) is greater than 5%.AS Data: The percentage of records with Unknown ZIP Code (XXXXX) is
	greater than 2%.
C010	The percentage of records with Persons Who do not Reside in the U.S. ZIP Code (YYYYY) is greater than 50%
C011	The percentage of records with Homelessness Indicators equal to Y is greater than 50%
C015	All records are reported in one Disposition of Patient category. Excludes "Home/Self Care" (routine discharge).
C016	The percentage of records with Patient Disposition-Other is greater than 0.5%.
C017	All records are reported in one Expected Source of Payment category.
C021	No Principal Procedure reported on any records (ED only).
C031	The percentage of records with R69 (Unspecified/unknown) as the Principal Diagnosis is greater than 0.1%.
C033	The percentage of records with Expected Source of Payment-Other is greater than 2%.
C046	100% of records reported with the same Preferred Language Spoken Code.
C047	The percentage of records with Unknown Preferred Language Spoken (999) is greater than 0.5%
C048	The percentage of records with an SW14 flag is greater than 1%. These records are reported with a PLS write-in that is questionable and requires verification by the facility.
C049	The percentage of records with PLS UND (Undetermined) is greater than 0.5%.
C050	The percentage of records with PLS ZXX (No linguistic/language content) is greater than 0.1%.

Comparative Edit Flag	Description
C051	AS Data only: One or more records are reported with Patient Disposition 20 - Expired.
	Verify that this is an AS encounter and that the Principal Diagnosis and Procedures are correctly reported.
C053	The percentage of records with Expected Source of Payment 'MA' (Medicare Part A) is greater than 0.1%.
C054	ED Data only: The percentage of records reported with a Principal Procedure is less than 5%.
C055	AS Data only: One or more records are reported with a blank or invalid Principal Procedure.
C056	All records reported with only one Race per record.

WARNING (NON-CRITICAL) COMPARATIVE EDIT FLAGS AND DESCRIPTIONS

Warning Edit Flag	Description
CW07	Percent of Y92.9 (Unspecified Place of Occurrence) is 50% or more than the total number of Y92's reported. Please review records and correct to a more specific place of occurrence, if the information is available on the medical record.
CW10	ED Data: The number of Unknown SSN's reported is greater than 20%. Excludes records with age less than 1 year old.
	AS Data: The number of Unknown SSN's reported is greater than 15%. Excludes records with age less than 1 year old.
CW11	ED Data only: All records with Homeless ZIP Code (ZZZZZ) are reported with Diagnosis Code(s) Z59.00, Z59.01 and/or Z59.02 (Homelessness)

VI STANDARD EDIT PROGRAM

OVERVIEW

The Standard Edit Program edits the data reported within each record. There are two (2) types of Standard Edits: Field Edits and Relational Edits. Field edits identify data elements that are blank, incomplete, or invalid. Relational edits identify illogical relationships between two or more data elements within the same record.

The Error Tolerance Level (ETL) for Fatal Standard Edits is zero records. Data will be rejected if there are one or more records with Fatal Standard Edit flags. The ETL for Critical Standard Edits is 2% of records with one or more Critical Standard Edit flags, based on the total records reported. All edit flags in a record are counted as one (1) error.

How do I know if my data failed the Standard Edit Program?

Check the "Report Validation Summary" in the Report Dashboard to see if your data passed or failed the Standard Edit Program. This Summary displays either "Pass" or "Fail" and the number and percentage of records with an "S" flag.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

DEFINITIONS AND REPORTS

Fatal Standard (S) Edit Flag

An "S" flag, followed by a 3-digit number, may identify a Fatal Standard Edit Flag. Fatal S-Flags are applied toward the ETL. If there are one or more records with a Fatal S-flag, then the data will FAIL the Standard Edit Validation. Data must be corrected before it can be accepted.

Critical Standard (S) Edit Flag

An "S" flag, followed by a 3-digit number, may identify a Critical Standard Edit Flag. Critical S-Flags are applied toward the ETL. If there are more than 2% of records with one or more Critical S-flags, then the data will FAIL the Standard Edit Validation.

Standard Edit Warning (SW) Flag (Non-Critical Error)

An "SW" flag, followed by a 2-digit number, identifies a Standard Edit Warning Flag. SW-flags will not cause the data to be rejected since they are not applied toward the ETL. These warning flags are provided to alert the facility to review possible errors in the data.

Standard Edit Summary Report

This report displays all data elements with Standard Edit flags. There are three (3) tables: one for data elements that have Fatal S-flags, one for data elements that have Critical S-flags, and one for data elements that have Warning SW-flags. In each table, the data elements are listed in alphabetical order and include the number, flag, and percentage of S flag(s) within each data element. Use this Report to make sure that all errors are located and reviewed or corrected within each record.

<u>To access this report</u>: From the "Report Validation Summary" of the Report Dashboard, click on "Summary" in the Standard Edits section. You can print and/or save this report.

Standard Edit Detail Report

This report displays records that have one or more S or SW-flags. This report is sorted by Service Date, then by Abstract Record Number within each Service Date.

<u>To access this report:</u> From the "Standard Edit Summary Report", click on the type of flag (Fatal, Critical, Warning), data element, or individual edit flag. These reports are filtered based on your selection. To view all records with Standard Edit flags, click on "Record Listing" in the Menu to be directed to the Record Listing page. From this page, click on "Standard Edit Detail" in the Menu. You can print and/or save these reports.

INVALID SOCIAL SECURITY NUMBER RANGES

- Identical numbers repeated 7 or 8 times (except 000000001 Unknown SSN). Numbers do not have to be in consecutive order
- 9 identical numbers
- Alpha characters
- The last 4 numbers are 0000
- 4th and 5th digits are 00
- The first three (3) numbers are:
 - ✓ 000
 - ✓ 666
 - ✓ 900 through 999
- Reported as '100101000' or '001010001'

FATAL STANDARD EDIT FLAGS AND DESCRIPTIONS

Fatal Standard Edit Flag	Description
S001	Principal Diagnosis is blank, or Service Date is blank
S002	Principal Diagnosis Code is Invalid, or Service Date is invalid
S059	New Principal Diagnosis Code is reported <u>BEFORE</u> the Effective Begin Date (Usually October 1)
S060	Old Principal Diagnosis Code is reported <u>AFTER</u> THE Effective End Date (Usually September 30)
S123	Service Date is out-of-range for the report period
S146	Abstract Number and Social Security Number cannot be the same value

CRITICAL STANDARD EDIT FLAGS AND DESCRIPTIONS

Critical Standard Edit Flag	Description
S001	Blank
S002	Invalid. Data reported is not a valid HCAI value
	For Preferred Language Spoken: Valid values include alpha characters; ' (apostrophe); – (hyphen), and 999. All other special characters and numeric values are invalid.
S003	Total Charges is reported as \$1 (No Charge) but Expected Source of Payment is not equal to 00 (Other)
S011	Sex is illogical with Male Principal Diagnosis Code
S018	Duplicate Diagnosis Codes reported
S019	Principal Procedure is Blank, yet Other Procedures are reported
S021	Age is illogical with Principal Diagnosis Code
S054	Age of the patient is greater than 120 years old
S057	ED Data only: Total Charges are Blank on Newborn record. Are the Charges included on the mother's record?
S059	New Diagnosis Code is reported <u>BEFORE</u> the Effective Begin Date (Usually October 1)
S060	Old Diagnosis Code is reported <u>AFTER</u> the Effective End Date (Usually September 30)
S080	Date of Birth is after the Service Date
S086	Sex is illogical with Female Principal Diagnosis Code
S087	Sex is illogical with Male Other Diagnosis Code

Critical Standard Edit Flag	Description
S088	Sex is illogical with Female Other Diagnosis Code
S103	Duplicate External Cause Codes reported
S105	Age is illogical with Other Diagnosis Code
S109	Age is illogical with External Cause Code
S114	New CPT-4 Procedure Code is reported <u>BEFORE</u> the Effective Begin Date (Usually January 1 or July 1)
S116	New External Cause Code is reported <u>BEFORE</u> the Effective Begin Date (Usually October 1)
S119	Old CPT-4 Procedure Code is reported <u>AFTER</u> the Effective End Date (Usually December 31)
S121	Old External Cause Code is reported <u>AFTER</u> the Effective End Date (Usually September 30)
S123	Service Date is Out-of-Range for the report period
S124	New Patient Disposition Code reported <u>BEFORE</u> the Effective Begin Date
S125	Old Disposition of Patient Code reported AFTER the Effective End Date
S126	New Expected Source of Payment Code reported <u>BEFORE</u> the Effective Begin Date
S127	Old Expected Source of Payment Code reported <u>AFTER</u> the Effective End Date
S128	An Evaluation and Management (E&M) code should not be reported as Principal Procedure <u>when</u> there are other procedures reported on the record within the Surgery Group 10021-69999. Switch the E&M Code with one of the Other Procedures that is more closely related to the Principal Diagnosis and is the chief reason for the encounter.
S138	The PLS Code or language reported is <u>AFTER</u> its removal from HCAI Regulations
S139	Total Charges is greater than \$450,000
S142	Homelessness Indicator is illogical with Principal Diagnosis Code
S143	Homelessness Indicator is illogical with Other Diagnosis Code
S144	Duplicate Race Codes reported
S145	The Races reported are an illogical combination
S147	Illogical combination. Indicate Country Code for those who reside outside the U.S.

WARNING STANDARD EDIT FLAGS AND DESCRIPTIONS (Non-Critical Flags)

Warning (Non-Critical) Standard Edit Flag	Description
SW02	Partial ZIP Code reported
SW05	Principal Diagnosis: HIV test result reported
SW06	Other Diagnosis: HIV test result reported
SW11	Total Charges is less than \$100 or more than \$450,000
SW14	Questionable PLS write-in reported. Please review and verify the Preferred Language Spoken.
SW16	Partial Patient Address reported. Street Address, City, State, and/or ZIP Code is/are blank.
SW17	Partial Patient Address reported. ZIP Code is valid and Homelessness Indicator equals N or U, but Street Address, City, and/or State is/are blank.
SW18	Invalid City

VII DUPLICATE RECORDS EDIT PROGRAM

OVERVIEW

The Duplicate Records Edit Program evaluates data for possible duplicate records in a report period by comparing data elements between each record reported. Invalid values are also compared. The records are grouped by Social Security Number and Abstract Record Number.

The Error Tolerance Level (ETL) for Critical Duplicate Records Edits is 2% of records with one or more Critical Duplicate Records Edit flags, based on the total records reported. All edit flags in a record are counted as one (1) error.

How do I know if my data failed the Duplicate Records Edit Program?

Check the "Report Validation Summary" in the Report Dashboard to see if your data passed or failed the Duplicate Records Edit Program. This Summary displays either "Pass" or "Fail" and the number and percentage of records with an "D" flag.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

DEFINITIONS AND REPORTS

Critical Duplicate Records (D) Edit Flag

A "D" flag, followed by a 3-digit number, may identify a Critical Duplicate Records Edit Flag. Critical D-Flags are applied toward the ETL. If there are more than 2% of records with one or more Critical D-flags, then the data will FAIL the Duplicate Records Edit Validation.

Duplicate Records Edit Warning (DW) Flag (Non-Critical Error)

A "DW" flag, followed by a 2-digit number, identifies a Duplicate Records Edit Warning Flag. DWflags will not cause the data to be rejected since they are not applied toward the ETL. These warning flags are provided to alert the facility to review possible errors in the data.

Duplicate Records Edit Summary Report

This report displays all data elements with Duplicate Records Edit flags. There are two (2) tables: one for data elements that have Critical D-flags, and one for data elements that have Warning DW-flags. In each table, the data elements are listed in alphabetical order and include the number, flag, and percentage of D flag(s) within each data element. Use this Report to make sure that all errors are located and reviewed or corrected within each record.

<u>To access this report</u>: From the "Report Validation Summary" of the Report Dashboard, click on "Summary" in the Duplicate Records Edits section. You can print and/or save this report.

Duplicate Records Edit Detail Report

This report displays records that have one or more D or DW-flags. The records are grouped by Social Security Number and Abstract Record Number.

<u>To access this report:</u> From the "Duplicate Records Edit Summary Report", click on the type of flag (Critical or Warning), data element, or individual edit flag. These reports are filtered based on your selection. To view all records with Duplicate Records Edit flags, click on "Record Listing" in the Menu to be directed to the Record Listing page. From this page, click on "Duplicate Records Edit Detail" in the Menu. You can print and/or save these reports.

WARNING DUPLICATE RECORDS EDIT FLAGS AND DESCRIPTIONS (Non-Critical Flags)

Warning (Non-Critical) Standard Edit Flag	Description
DW01	Duplicate Records Found
DW02	Duplicate Records Found with the exception of Total Charges

VIII AGE AND SEX EDIT TABLES

AGE EDIT TABLE

ICD-10-CM Diagnosis Code	Record will flag if Age at Admission is:
A18.14	Age is less than 15
A33.	Age is greater than 1
A34.	Age is less than 12 or greater than 55
A48.51	Age is greater than 17
B08.20 - B08.22	Age is greater than 17
C58.	Age is less than 12 or greater than 55
C91.50 - C91.52	Age is less than 15
C93.30 - C93.32	Age is greater than 17
D39.2	Age is less than 12 or greater than 55
E28.310	Age is less than 15
E28.319	Age is less than 15
E30.1	Age is greater than 17
E30.8	Age is greater than 17
E84.11	Age is greater than 1
F01.50 – F01.C4	Age is less than 15
F03.90 – F03.C4	Age is less than 15
F53.0	Age is less than 12 or greater than 55
F53.1	Age is less than 12 or greater than 55
F64.2	Age is greater than 17
F69.	Age is less than 15
F84.3	Age is greater than 17
G11.2	Age is less than 15
G12.21	Age is less than 15
G30.1	Age is less than 15
G93.44	Age is less than 15
G93.7	Age is greater than 17
H02.031 - H02.039	Age is less than 15
H02.131 - H02.139	Age is less than 15
H04.531 - H04.539	Age is greater than 1
H25.011 - H25.9	Age is less than 15
H26.001 - H26.09	Age is greater than 17
H31.111 - H31.119	Age is less than 15
H35.30 - H35.3293	Age is less than 15
H35.441 - H35.449	Age is less than 15
H43.821 - H43.829	Age is less than 15
123.0 - 123.3	Age is less than 15
123.6 - 123.8	Age is less than 15
125.10 - 125.119	Age is less than 15
125.700 - 125.739	Age is less than 15
125.752	Age is less than 15
125.760 - 125.810	Age is less than 15
