

# **Edit Flag Description Guide**

## **INPATIENT DATA**

**December 2023**

**Version 40**

State of California  
Department of Health Care Access and Information (HCAI)  
Patient Data Section  
2020 West El Camino Avenue  
Sacramento, CA 95833  
(916) 326-3935

## **SUMMARY OF CHANGES**

### **VERSION 40**

**Effective with discharges on and after January 1, 2024  
(January – June 2024 Report Period)**

#### **AGE/SEX EDIT TABLES (pages 34-44)**

Updated ICD-10-CM Diagnosis and ICD-10-PCS Procedure codes.

# I INTRODUCTION

There are currently six (6) edit programs applied to inpatient data. Data submitted via file submission or manual record entry, are processed through the edit programs. Each record is edited, and any errors found within the record are identified by edit flags.

This guide provides detailed information about each edit program, the applicable Error Tolerance Levels, and a list of the edit flags and their descriptions.

Edit Programs:

Transmittal Validation

Licensing Check

Trend Edits

Comparative Edits

Standard Edits

Re-Admission Edits

## II EDIT PROGRAMS AT-A-GLANCE

### UNDERSTANDING THE EDIT PROGRAMS

Your data will be rejected if it fails any of the edit programs. "Fail" means your data is not at or below the established Error Tolerance Level (ETL). Understanding the edit programs and the reasons your data might fail is very important when determining the best way to correct errors.

**If your report fails either the Transmittal Validation or Licensing Check, it will be rejected and will not be processed through the remaining edit programs.**

Program	Description	Likely Cause of Failure
Transmittal Validation	<p>Checks for proper file format and compares the "Expected" (based on the Transmittal Page information) to "Actual" data submitted.</p> <ul style="list-style-type: none"> <li>• Incorrect file format</li> <li>• One (1) or more records are reported with a Discharge Date that is blank, invalid, or outside the Report Period.</li> <li>• Incorrect Facility ID Number on one or more records</li> <li>• Abstract Record Number equals Social Security Number</li> </ul>	Your data did not pass one or more of the transmittal validations.
Licensing Check	<p>Checks to make sure your data includes all the types of care and services for which your facility is licensed. For example, if your facility is licensed for Acute care, but no records are reported as Acute type of care, then your data will fail this program.</p> <p>NOTE: This program does not check for records that include a type of care for which your facility is <u>not</u> licensed. The Standard Edit program identifies this type of error.</p>	Your facility is licensed for a specific type of care, but that type of care is not being reported on any of your records.
Trend Edit (T flag)	<p>Compares the data in the current report period to the facility's historical data to identify uncharacteristic increases or decreases in percentages reported for certain data elements/categories.</p> <p><u>EXAMPLE:</u> In the Current Report Period, your facility reported 65% Non-Hispanic patients, but in the previous two (2) report periods, you reported only 20% Non-Hispanic patients. If this percentage difference between report periods is outside the "Allowable Difference", then either a Critical or Non-Critical Trend flag is generated. Non-Critical flags will not cause your data to fail this program, but one or more Critical flags will.</p>	Your data caused the program to generate one or more Critical Trend flags.

Program	Description	Likely Cause of Failure
Comparative Edit (C flag)	Checks for reasonable distribution of categories within each data element for the Current Report Period. <u>EXAMPLE:</u> If 100% of your records are reported with Patient Disposition-Home, this program will generate a Comparative Edit flag and your data will fail.	Your data caused the program to generate one or more Comparative Edit flags.
Standard Edit (S flag)	Checks for data entry errors and inconsistencies of data reported within each record. <u>EXAMPLE:</u> Admit Date is AFTER the Discharge Date.	More than 2% of your records contain standard edit errors.
Readmission Edit (K flag)	Groups records that contain identical Social Security Numbers (SSNs), and then checks for inconsistencies between the records. <u>EXAMPLE:</u> Two records with the same SSN cannot have different Dates of Birth; either the SSN or the Date of Birth is incorrect.	More than 2% of your records contain readmission edit errors.

## III TRANSMITTAL VALIDATION

### OVERVIEW

Transmittal Validation checks for proper file format, blank and invalid discharge dates, incorrect facility ID numbers, and Abstract Record Numbers that are the same as Social Security Numbers.

**Error Tolerance Level:** Data must pass validation before continuing through the remaining edit programs.

#### **How do I know if my data failed Transmittal Validation?**

Access the "Main Error Summary" to see if your data passed or failed Transmittal Validation. If the data failed Transmittal Validation, the Summary will display the error message(s) and record number(s) that contain the error.

- Up to 20 records are listed.
- If there more than 20 records with a transmittal error, then the following message will be displayed:  
**There are more than 20 records with a transmittal error.  
Only the first 20 records with errors are listed.**

To access this Summary: Click on the appropriate data type and report period on the Home screen.

Data will be rejected if it fails one or more of the following edits. Data must pass Transmittal Validation before continuing on to the remaining edit programs.

- Incorrect File Format
- Blank and Invalid Discharge Dates
- Incorrect Facility ID Number
- Abstract Record Number equals Social Security Number

## TRANSMITTAL ERROR MESSAGES

<i>Transmittal Edit</i>	<i>Error Message</i>
<b>To easily locate the error, the Report Validation Summary will display the Record Number(s) that contain a transmittal error. Up to 20 records are listed.</b>	
Incorrect file format	Record length is less than the required format.
Records with a Discharge Date outside the Report Period	One or more records are reported with a Discharge Date that is blank, invalid, or outside the Report Period.
Incorrect Facility ID Number	Incorrect Facility ID Number reported on one or more records.
Abstract Record Number equals Social Security Number	Abstract Record Number is the same as Social Security Number on one or more records.

## IV LICENSING CHECK

### OVERVIEW

The Licensing Check edits your facility's data against HCAI's Licensing File to verify that the data reported is consistent with the Types of Care and Services for which it is licensed.

**Error Tolerance Level:** Data will fail the Licensing Check if it does not match HCAI's licensing information, and all further editing is terminated.

Once the data passes the Licensing Check, it will continue through the remaining Edit Programs.

**NOTE:** The Licensing Check does not edit records that include a Type of Care or Service for which your facility is not licensed. This is checked in the Standard Edit Program and is identified by an S flag.

### **How do I know if my data failed the Licensing Check?**

Check the "Report Validation Summary" in the Report Dashboard to see if your data passed or failed the Licensing Check. The Summary displays either "Pass" or "Fail" for this edit program. If data has failed, the applicable error message(s) is also be displayed.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

*If it is determined that the data submitted is correct as reported, please contact your HCAI analyst to explain the licensing changes.*

**See next page for a list of the Licensing Check error messages and explanations...**

## LICENSING CHECK ERROR MESSAGES

<b><i>Licensing Check (Message displayed on Report Validation Summary)</i></b>	<b><i>Explanation</i></b>
No records reported in Type of Care 1	Hospital is licensed for Acute Care but there are no records reported in this type of care.
No records reported in Type of Care 3	Hospital is licensed for Skilled Nursing/Intermediate Care but there are no records reported in this type of care.
No records reported in Type of Care 4	Hospital is licensed for Psychiatric Care but there are no records reported in this type of care.
No records reported in Type of Care 5	Hospital is licensed for Chemical Dependency Care but there are no records reported in this type of care.
No records reported in Type of Care 6	Hospital is licensed for Physical Rehabilitation Care but there are no records reported in this type of care.
No records reported in Source of Admission – Your ED, but your facility is licensed for Emergency Department Services	Hospital is licensed as a Basic or Comprehensive Emergency Department, but there are no admits through “Your ED”.

## V TREND EDIT PROGRAM

### OVERVIEW

The Trend Edit Program is designed to check for inconsistencies in data by comparing data submitted in the current report period to data submitted in the last two (2) (historical) report periods. If the difference between the current data and the historical data is more than a specified percent, then a T (critical) or TW (non-critical) flag is applied to that data element or data element category. The facility must review any critical T flags in the data and verify whether or not the data is correct as reported.

**ALLOWABLE DIFFERENCE:** The Allowable Difference is based on Facility Size. Only the T003/TW03 and T004/TW04 flags use an “Allowable Difference” when comparing the current data to historical data. For more information, please refer to “Facility Size” and “Allowable Differences” under the DEFINITIONS/REPORTS in this section.

**NOTE:** Facilities with 75 records or less are excluded from the T001 and T002 Trend edits.

**FIXED PERCENT:** All other Trend Flags use **FIXED** percentages regardless of facility size. Please refer to the “Trend Edit Flags and Descriptions” table in this guide for a complete description of the flags.

**Error Tolerance Level: Data will fail the Trend Edit Program if one or more Critical Trend Flags (T) are identified in the data.**

### **How do I know if my data failed the Trend Edit Program?**

Check the “Report Validation Summary” to see if your data passed or failed the Trend Edit Program. The Summary will display either “Pass” or “Fail” for this edit program. For “Fail” status, the Summary also displays the number of trend edit flags identified in the data.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

The Trend Edit Program will not apply edits to a data element if:

- A data element in the current report period has a Modification or Variant Action and trend rules have been turned off.
- The current report period is less than 90 days. Conversely, an historical report period that is less than 90 days will not be used for trend analysis.
- There is no historical data for the facility (e.g., new facility)
- The four (4) historical report periods have a Modification or Variant Action on the data element that is being “trended” and the associated trend rules have been turned off.

### DEFINITIONS AND REPORTS

#### **Critical Trend (T) Flag**

A “T” flag, followed by a 3-digit number, identifies a Critical Trend Edit Flag.

A T-flag will result when the current data fails the Trend Edit in both historical report periods or it fails the Trend Edit against the only available historical report period. The affected data element category will receive the applicable T-Flag.

### Trend Warning (TW) Flag (Non-Critical Error)

A “TW” flag, followed by a 2-digit number, identifies a Warning (Non-Critical) Trend Edit Flag. A **TW-flag will NOT cause the data to be rejected**. These flags are “warnings” that alert the facility to review possible errors in the data.

### When will the data get a TW flag?

A TW-flag will result when the data FAILS the Trend Validation in the 1<sup>st</sup> historical report period but PASSES the Trend Validation in the 2<sup>nd</sup> historical report period, or vice-versa. In other words, a TW flag is applied when the current data Passes and Fails the same trend edit when compared to data in two (2) previous historical report periods.

Trend Flags on the Race, ZIP Code, and Prehospital Care and Resuscitation (DNR) data elements are always Warning Flags (TW01, TW02, TW03, and TW04), whether they fail the trend edit in one or both historical report periods.

### Facility Size

This is the total number of records submitted by a facility for the current report period. HCAI classifies facility size in nine (9) categories:

Hospital Size	Total Records Reported	Allowable Difference <i>Applies only to T003 and T004 flags</i>
Micro Small Hospital	1 to 75	40%
Very Very Small Hospital	76 to 100	20%
Very Small	101 to 250	15%
Small	251 to 500	12%
Medium	501 to 1000	10%
Large	1001 to 2500	8%
Very Large	2501 to 5000	7%
Super Large	5001 to 10000	6%
Ultra Large	10001 and up	5%

### Allowable Difference

This is the amount of increase or decrease that the system will allow between current data and historical data for a particular data element category.

**IMPORTANT:** For the T003/TW03 and T004/TW04 flags, the Allowable Difference is based on facility size—the larger the facility, the smaller the Allowable Difference.

How does the system determine that a data element category failed a Trend Edit?

After the system calculates the current and historical percentages for the data element category, it subtracts the Current Percentage reported from the Historical Percentage reported and compares the difference. If the calculated difference is outside the "Allowable Difference" (too high or too low), then a “T” or “TW” flag is applied. The Trend Edit Summary displays all the data element categories that have been flagged with a T or TW flag.

Use the Data Distribution Report in conjunction with the Trend Edit Summary Report, to help you determine if the data is in error or is correct as reported.

### **Trend Edit Summary Report**

This report identifies the data element categories that have been flagged with a T or TW flag. The report is in alphabetical order by Data Element and includes the percent or number of records reported for the Current Report Period; the “Allowable Difference”; and the percent or numbers from the corresponding historical report period(s).

To access this report: From the “Report Validation Summary” of the Report Dashboard, click on “Summary” in the Trend Edits section. You can print and/or save this report.

### **Data Distribution Report**

This is a report that displays each data element and lists the numerical and percentage breakdown of records within each data element category. Use this report to compare the data element categories that have been flagged with a “T” or “TW” flag to those categories (within the same data element) that were not flagged. It also may be useful to compare the “current” Data Distribution Report to “historical” Data Distribution Report(s) and look for any questionable increases or decreases in data element categories.

To access this report: From the “Other Report Information” section of the Report Dashboard, click on “Data Distribution Report (DDR)”. You can print and/or save this report. Use the Data Distribution Report, in conjunction with the Trend Edit Summary Report, to help you determine if data is in error or is correct as reported.

### **Report by Selected Data Element (custom report)**

When reviewing the Trend Summary Report, you may need to review records associated with the Trend Edit Flag. For example, Type of Admission (TOA)-Elective has a T003 flag— “The percent reported is lower than expected based on your historical data.” In order to determine whether or not this is an error, you may want to review all records reported in other TOA categories to see if some of these records need to be corrected to TOA-Elective, or to confirm if your data is correct as reported.

To generate a report by Selected Data Element, refer to the “Other Report Information” section of the Report Dashboard and click on “Selected Data Element Report”. You can select the appropriate data element(s) and filter criteria. This custom report, (all records reported as TOA-Emergency, Urgent, Newborn, Trauma and Information Not Available), can be generated and saved. It can then be accessed by the facility and used for Trend Edit error analysis.

**NOTE:** *If it is determined that the current data is correct as reported, please contact your HCAI analyst to explain.*

## TREND EDIT FLAGS AND DESCRIPTIONS

**Critical Flags are identified as a T flag**  
**Warning (Non-Critical) flags are identified as a TW flag**

<i>Trend Edit Flag</i>	<i>Description</i>
T001	The current percent reported for this data element category is ZERO, but your hospital's historical data shows data reported.
TW01	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T002	The current percent reported for this data element category is greater than 2%, but your hospital's historical data shows ZERO records reported in this category.
TW02	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T003	The current percent reported for this data element category is lower than expected, based on your hospital's historical data.
TW03	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T004	The current percent reported for this data element category is greater than expected, based on your hospital's historical data reported.
TW04	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T005	<u>Total number of records submitted</u> <b>decreased</b> more than 20%, based on your hospital's historical data.
TW05	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T006	<u>Total number of records submitted</u> <b>increased</b> more than 20%, based on your hospital's historical data.
TW06	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T007	<u>Average Number of Other Diagnoses</u> <b>decreased</b> more than 2 diagnoses per record, based on your hospital's historical data.
TW07	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T008	<u>Average Number of Other Procedures</u> <b>decreased</b> more than 2 procedures per record, based on your hospital's historical data.
TW08	Same description as above, but data failed this Trend Edit in only one (1) historical report period.

<b>Trend Edit Flag</b>	<b>Description</b>
T009	<u>Average Number of External Cause Codes</u> <b>decreased</b> more than 2 External Cause Codes per record, based on your hospital's historical data.
TW09	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T010	<u>Percent of Principal Procedures reported</u> <b>decreased</b> more than 5%, based on your hospital's historical data.
TW10	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T012	<u>Average Length of Stay**</u> <b>decreased</b> more than 50%, based on your hospital's historical data.
TW12	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T013	<u>Average Length of Stay**</u> <b>increased</b> more than 50%, based on your hospital's historical data.
TW13	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T014	<u>Adjusted Charge per Day**</u> <b>decreased</b> more than 50%, based on your hospital's historical data.
TW14	Same description as above, but data failed this Trend Edit in only one (1) historical report period.
T015	<u>Adjusted Charge per Day**</u> <b>increased</b> more than 50%, based on your hospital's historical data.
TW15	Same description as above, but data failed this Trend Edit in only one (1) historical report period.

**\*\* Calculations for Average Length of Stay and Adjusted Charges per Day:**

Average Length of Stay (ALOS): The ALOS is calculated by dividing the total number of discharge days by the total number of discharges reported by the facility.

NOTE: Length of Stay equals Discharge Date minus Admit Date. If the Discharge Date is the same as the Admit Date, then the length of stay is one day.

Adjusted Charge per Day (Adj C/D): The sum of the Adjusted Total Charges divided by Total Discharge Days

NOTE: Adjusted Total Charges: HCAI regulations require that only the total charges for the last 365 days are to be reported. This is calculated by dividing the Total Charges by 365 to **determine the average** charge per day. This average charge per day is then multiplied by the patient's actual length of stay. The result is the Adjusted Total Charges.

## VI COMPARATIVE EDIT PROGRAM

### OVERVIEW

The Comparative Edit Program evaluates data for “reasonable” distribution of data within each data element category for the current report period. If the percent reported is greater than expected, then the data element category will fail the Comparative Edit. Comparative Edits are not applied to blank or invalid data.

A C-Flag, followed by a 3-digit number, identifies critical Comparative Edits.

**Error Tolerance Level:** Data will fail the Comparative Edit Program if one or more critical Comparative Edit Flags are identified in the data.

#### **How do I know if my data failed the Comparative Edit Program?**

Check the "Report Validation Summary" in the Report Dashboard to see if your data passed or failed the Comparative Edits. The Summary displays either “Pass” or “Fail” for this edit program. For “Fail” status, the Summary also displays the number of comparative edit flags identified in the data.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

### DEFINITIONS AND REPORTS

#### **Critical Comparative (C) Flag**

A “C” flag, followed by a 3-digit number, identifies a Critical Comparative Edit Flag. A C-flag will result when the percent of data reported within a particular data element category is greater than expected. The affected data element category will receive the applicable C-Flag.

#### **Comparative Warning (CW) Flag (Non-Critical Error)**

A “CW” flag, followed by a 2-digit number, identifies a Warning (Non-Critical) Comparative Edit Flag. **A CW-flag will NOT cause the data to be rejected.** These flags are “warnings” that alert the facility to review possible errors in the data.

#### **Allowable Percentage**

This is the percent of increase in a data element category that the system allows before flagging it as a **possible error**. Depending on the Comparative Edit, the “Allowable Percentage” is either based on facility size; or is a “fixed” percent that applies to all facilities regardless of size.

## Facility Size

This is the total number of records submitted by a facility for the current report period. HCAI classifies facility size in the following five (5) categories:

Hospital Size	Total Records Reported	Allowable Percentage
Very Small Hospital	1 to 100 discharges	25%
Small Hospital	101 to 500 discharges	20%
Medium Hospital	501 to 1,000 discharges	15%
Large Hospital	1,001 to 5,000 discharges	10%
Very Large Hospital	5,001 and more discharges	5%

### How does the system determine if a data element category failed a Comparative Edit?

- Based on the quantity of records reported, the system calculates the percent of records reported in a data element category. If the reported percent is above the Allowable Percentage, then a C-flag is applied to that data element category.
- The Comparative Edit Summary Report displays all the data element categories that have been flagged with a C flag.

### Example of a Comparative Edit that uses an Allowable Percentage based on Facility Size:

The Total Records submitted by Facility A is 1,200 (Facility Size); therefore, their Allowable Percentage is 10%.

C005: This edit checks to see if the percent of records with Unknown-Ethnicity is above the percentage expected for the facility. In this example 10% is the expected percentage for Facility A.

Facility A reported 12.5% of their records with an Unknown Ethnicity. Since their Allowable Percentage is 10%, this data element category will receive a C005 Flag.

### Example of a Comparative Edit that is based on a fixed percent:

C012: All records (100%) are reported in one category for Source of Admission – Point of Origin.

If a facility reports 100% of their records as Source of Admission-Court/Law Enforcement, then the data will receive a C012 flag. The Facility Size is irrelevant for this edit— facilities with either 100 records or 10,000 records will both fail this edit if 100% of their records are reported in one Source of Admission data element category.

### **Comparative Edit Summary Report**

This report identifies the data element categories that have been flagged with a C flag. The report is in alphabetical order by data element and includes the data element category; percent of records reported (Current Report Period); the “Allowable Percentage” (if applicable); and the corresponding C flag.

To access this report: From the “Report Validation Summary” of the Report Dashboard, click on “Summary” in the Comparative Edits section. You can print and/or save this report.

Use the Data Distribution Report, in conjunction with the Comparative Edit Summary Report, to help you determine if data is in error or is correct as reported.

### **Data Distribution Report**

This is a report that displays each data element and lists the numerical and percentage breakdown of records within each data element category. Use this report to compare the data element categories that have been flagged with a “C” flag to those categories (within the same data element) that were not flagged.

To access this report: From the “Other Report Information” section of the Report Dashboard, click on “Data Distribution Report (DDR)”. You can print and/or save this report.

### **Report by Selected Data Element (custom report)**

When reviewing the Comparative Edit Summary Report, you may need to review records associated with a Comparative Edit Flag. For example, Type of Admission (TOA)-Information Not Available has a C014 flag— “The number of TOA- Information Not Available is above the percent expected for your facility”. In order to correct these records, it would be helpful to generate a report that lists all records reported as Type of Admission- Information Not Available.

To generate a report by Selected Data Element, refer to the “Other Report Information” section of the Report Dashboard and click on “Selected Data Element Report”. You can select the appropriate data element(s) and filter criteria. This custom report, (all records reported as TOA- Information Not Available, sorted by Abstract Record Number), can be generated and saved. It can then be accessed by the facility and used for Trend Edit error analysis.

**NOTE:** *If it is determined that the current data submitted is accurate, please contact your HCAI Analyst to explain.*

## CRITICAL COMPARATIVE EDIT FLAGS AND DESCRIPTIONS

<b>Comparative Edit Flag</b>	<b>Description</b>
C001	All records are reported in one Sex category: Male or Female
C003	Percent of records reported with Unknown Sex is greater than 0.1%.
C004	All records are reported in one Ethnicity category.
C005	Records reported as Ethnicity-Unknown are above the percent expected for your hospital.
C006	All records are reported in one Race category.
C007	Records reported as Race-Unknown are above the percent expected for your hospital.
C008	Percent of records with a partial ZIP Code is greater than 2%.
C009	Percent of records with Unknown ZIP Code (XXXXX) is greater than 3%.
C010	Foreign ZIP Code (YYYYY): Records reported are above the percent expected for your hospital.
C011	Percent of Homelessness Indicators equal to Y is above the percentage expected for your hospital.
C012	All records are reported in one category for Source of Admission – Point of Origin.
C013	Percent of records with Source of Admission – Information Not Available is greater than 2%.
C014	Percent of records with Type of Admission – Information Not Available is greater than 0.5%.
C015	All records are reported in one Patient Disposition category.
C016	Percent of records with Patient Disposition-Other is greater than 0.5%.
C017	All records are reported in one “Payer” category for Expected Source of Payment.
C018	Expected Source of Payment: All records reported with a Type of Coverage “1” (HMO) have the same Plan Code.
C019	Expected Source of Payment: More than 10% of records with Type of Coverage “1” (HMO) are reported with Plan Code 8000.
C020	No Other Diagnoses Codes reported.
C021	No Principal Procedure reported on any records.
C022	No Other Procedures reported on Acute Care records (Type of Care 1).
C023	No Other Procedures reported on Skilled Nursing/Intermediate Care records (Type of Care 3).
C024	No Other Procedures reported on Psychiatric Care records (Type of Care 4).
C025	Prehospital Care and Resuscitation (DNR): All records are reported as Yes.
C026	Prehospital Care and Resuscitation (DNR): 100% of Acute Care records (Type of Care 1) are reported as No.
C027	Prehospital Care and Resuscitation (DNR): 100% of Skilled Nursing/Intermediate Care records (Type of Care 3) is reported as No.

<b>Comparative Edit Flag</b>	<b>Description</b>
C028	Principal Diagnosis Present on Admission: The percent of records reported with No (N), Unknown (U), or Clinically Undetermined (W) is greater than 10% of the total number of PDX-POA Indicators equal to Y, N, U, W. Excludes: ICD-10 principal diagnoses O70.0 thru O70.4 and O70.9
C029	Other Diagnosis Present on Admission Indicators are reported as 100% Yes (Y). Excludes POA reported as 'blank' for exempt diagnosis codes.
C030	Other Diagnosis-Present on Admission: The percent of POA's reported as No (N), Unknown (U), or Clinically Undetermined (W) is greater than 30% of the total number of ODX-POA Indicators equal to Y, N, U, W.
C031	Percent of records with R69 as the Principal Diagnosis is greater than 0.1%.
C032	All records are reported in one Type of Admission category.
C043	External Cause Code Present on Admission Indicator is reported as 100% No (N). Excludes exempt values reported as "blank".
C044	External Cause Code Present on Admission Indicator is reported as 100% UNKNOWN (U). Excludes exempt values reported as "blank".
C045	External Cause Code Present on Admission Indicator is reported as 100% Clinically Undetermined (W). Excludes exempt values reported as "blank".
C046	100% of records reported with the same Preferred Language Spoken Code.
C047	Percent of records with Unknown Preferred Language Spoken (999) is greater than 0.5%.
C048	Percent of records with an SW14 flag is greater than 1%. These records are reported with a PLS write-in that is questionable and requires verification by the facility.
C049	The percentage of records with PLS UND (Undetermined) is greater than 0.5%.
C050	The percentage of records with PLS ZXX (No linguistic/language content) is greater than 0.1%.
C056	All records reported with only one Race per record.
C057	Percent of newborn records is 4% less than the percent of liveborn delivery records. Excludes newborns born outside the hospital. Includes records with: Newborn ICD-10 diagnoses equal to Z38.00, Z38.01, Z38.2, Z38.30, Z38.31, Z38.5, Z38.61, Z38.62, Z38.63, Z38.64, Z38.65, Z38.66, Z38.68, Z38.69, or Z38.8 Delivery (liveborn) ICD-10 diagnoses equal to Z37.0, Z37.2, Z37.3, Z37.50, Z37.51, Z37.52, Z37.53, Z37.54, Z37.59, Z37.60, Z37.61, Z37.62, Z37.63, Z37.64, Z37.69, or Z37.9

<b>Comparative Edit Flag</b>	<b>Description</b>
C058	<p>Percent of liveborn delivery records is 4% less than the percent of newborn records. Excludes newborns born outside the hospital.</p> <p>Includes records with:</p> <p>Newborn ICD-10 diagnoses equal to Z38.00, Z38.01, Z38.2, Z38.30, Z38.31, Z38.5, Z38.61, Z38.62, Z38.63, Z38.64, Z38.65, Z38.66, Z38.68, Z38.69, or Z38.8</p> <p>Delivery (liveborn) ICD-10 diagnoses equal to Z37.0, Z37.2, Z37.3, Z37.50, Z37.51, Z37.52, Z37.53, Z37.54, Z37.59, Z37.60, Z37.61, Z37.62, Z37.63, Z37.64, Z37.69, or Z37.9</p>

**WARNING (NON-CRITICAL) COMPARATIVE EDIT FLAGS AND DESCRIPTIONS**

<b><i>Warning Edit Flags</i></b>	<b><i>Description</i></b>
CW07	Percent of Y92.9 (Unspecified Place of Occurrence) is 50% or more than the total number of Y92's reported. Please review records and correct to a more specific place of occurrence, if the information is available on the medical record.
CW08	No records with Homelessness Indicator equal to Y reported.
CW10	The number of Unknown SSN's reported is greater than 10%. Excludes records with age less than 1 year old.
CW11	All records with Homelessness Indicator equal to Y are reported with Diagnosis Code(s) Z59.00, Z59.01 and/or Z59.02 (Homelessness).

## VII STANDARD EDIT PROGRAM

### OVERVIEW

The Standard Edit Program edits the data reported within each record. There are two (2) types of Standard Edits— Field Edits and Relational Edits. Field edits identify data elements that are blank, incomplete, or invalid. Relational edits identify illogical relationships between two or more data elements within the same record.

**The Error Tolerance Level (ETL) for Fatal Standard Edits is zero records. Data will be rejected if there are one or more records with Fatal Standard Edit flags. The ETL for Critical Standard Edits is 2% of records with one or more Critical Standard Edit flags, based on the total records reported. All edit flags in a record are counted as one (1) error.**

### **How do I know if my data failed the Standard Edit Program?**

Check the "Report Validation Summary" in the Report Dashboard to see if your data passed or failed the Standard Edits. The Summary displays either "Pass" or "Fail" and the number and percent of records with an "S" flag.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

### DEFINITIONS AND REPORTS

#### **Fatal Standard (S) Edit Flag**

An "S" flag, followed by a 3-digit number, may identify a Fatal Standard Edit Flag. Fatal S-Flags are applied toward the ETL. If there are one or more records with a Fatal S-flag, then the data will FAIL the Standard Edit Validation. Data must be corrected before it can be accepted.

#### **Critical Standard (S) Edit Flag**

An "S" flag, followed by a 3-digit number, identifies a Critical Standard Edit Flag. Critical S-flags are applied towards the ETL. If there are more than 2% of records with one or more S-flags, then the data will FAIL the Standard Edit Validation.

#### **Standard Edit Warning (SW) Flag (Non-Critical Error)**

An "SW" flag, followed by a 2-digit number, identifies a Warning Standard Edit Flag. SW-flags will not cause the data to be rejected since they are not applied towards the ETL. These warning flags are provided to alert the facility to review possible errors in the data.

#### **Standard Edit Summary Report**

This report displays all data elements with Standard Edit flags. There are three (3) tables— one for data elements that have Fatal S-flags, one for data elements that have Critical S-Flags, and one for data elements that have SW-flags. In each table, the data elements are listed in alphabetical order and include the number, flag, and percent of S or SW flags within each data element. Use this report to make sure that all errors are located and reviewed or corrected within each record.

To access this report: From the "Report Validation Summary" of the Report Dashboard, click on "Summary" in the Standard Edits section. You can print and/or save this report.

### Standard Edit Detail Report

This report displays records that have one or more S or SW flags. The report is sorted by Type of Care, and then by Discharge Date within each Type of Care.

To access this report: From the “Standard Edit Summary Report”, click on the type of flag (Fatal, Critical, Warning), data element, or individual edit flag. These reports are filtered based on your selection. To view all records with Standard Edit flags, click on “Record Listing” in the Menu to be directed to the Record Listing page. From this page, click on “Standard Edit Detail” in the Menu. You can print and/or save these reports.

### EXPECTED SOURCE OF PAYMENT (ESOP)

The ESOP data element is made up of three components: Payer Category, Type of Coverage and Name of Plan. The Standard Edit Program includes edits that identify records reported with an “illogical combination” of ESOP, i.e., 2 or more of the ESOP components have been reported incorrectly.

Standard Edit Flags for Illogical combinations of ESOP:

Critical Flags: S062, S063, S064

Warning Flags: none

Below is a reference guide to assist you in making corrections to these errors:

#### Valid ESOP Combinations

For Payer Category:	If Type of Coverage is:	Then Health Plan Identification Number is:
01, 02, 03, 04, 05, 06	1 Knox-Keene (HMO) or COHS Plan	Valid Plan Code Number
01, 02, 03, 04, 05, 06	2 Managed Care - Other (PPO, IPO, POS, etc.)	0000
01, 02, 03, 04, 05, 06	3 Traditional Coverage (Fee for Service)	0000
07, 08, 09	0 No Coverage	0000

### INVALID SOCIAL SECURITY NUMBER RANGES

- Identical numbers repeated 7 or 8 times (except 000000001 – Unknown SSN). Numbers do not have to be in consecutive order
- 9 identical numbers
- Alpha characters
- The last 4 numbers are 0000
- 4th and 5th digits are 00
- The first three (3) numbers are:
  - ✓ 000
  - ✓ 666
  - ✓ 900 through 999
- Reported as ‘100101000’ or ‘001010001’

### FATAL STANDARD EDIT FLAGS AND DESCRIPTIONS

<i>Fatal Standard Edit Flag</i>	<i>Description</i>
S001	Principal Diagnosis is blank, or Discharge Date is blank
S002	Principal Diagnosis Code is Invalid, or Discharge Date is invalid
S058	Discharge Date is Out of Range for the Report Period.
S059	New Principal Diagnosis Code is reported <u>BEFORE</u> the Effective Begin Date (Usually October 1)
S060	Old Principal Diagnosis Code is reported <u>AFTER</u> THE Effective End Date (Usually September 30)
S146	Abstract Record Number and Social Security Number cannot be the same value

### CRITICAL STANDARD EDIT FLAGS AND DESCRIPTIONS

<i>Critical Standard Edit Flag</i>	<i>Description</i>
S001	Blank. No data reported.
S002	Invalid. Data reported is not a valid HCAI value. For <b>Preferred Language Spoken</b> : Valid values include alpha characters; '(apostrophe), – (hyphen), and 999. All other special characters and numeric values are invalid.
S003	Total Charges is reported as \$1 (No Charge), but Expected Source of Payment is not equal to 09 0 0000 (Other Payer)
S006	The combination of Source of Admission, Type of Admission and the Principal Diagnosis is illogical on a newborn record.
S007	Date of Birth is <u>AFTER</u> the Admission Date.
S008	Principal Diagnosis indicates Newborn, but the Type of Admission is <u>not</u> reported as '4' (Newborn).
S009	Admission Date is <u>AFTER</u> the Discharge Date
S011	Sex is illogical with Male Principal Diagnosis Code.
S013	Principal Procedure Date is <u>AFTER</u> the Discharge Date.
S016	Date of Birth and the Admission Date are not the same but Principal Diagnosis indicates Newborn born in the Hospital.
S018	Duplicate Diagnoses codes reported.
S019	Principal procedure is Blank, yet Other Procedures are reported.
S021	Age is illogical with Principal Diagnosis Code.

<b>Critical Standard Edit Flag</b>	<b>Description</b>
S024	Principal Procedure Date reported is more than three days <u>before</u> the Admission Date.
S048	Type of Care: Your hospital is <u>not licensed</u> for Acute Care.
S049	Type of Care: Your hospital is <u>not licensed</u> for SN/IC Care.
S050	Type of Care: Your hospital is <u>not licensed</u> for Psychiatric Care.
S051	Type of Care: Your hospital is <u>not licensed</u> for Chemical Dep Care.
S052	Type of Care: Your hospital is <u>not licensed</u> for Physical Rehabilitation Care.
S054	Age of the patient is greater than 120 years old.
S055	Total Charges reported are less than \$1,000 for Newborn. Principal Diagnosis indicates Newborn.
S056	There are no Other Diagnoses or Other Procedures reported on the Newborn record, but the <u>Charge per Day</u> is greater than \$3,200. Principal Diagnosis indicates Newborn.
S057	Total Charges are blank on Newborn record. Are the charges included on the mother's record? Principal Diagnosis indicates Newborn.
S058	Discharge Date is Out of Range for the Report Period.
S059	New Diagnosis Code is reported <u>BEFORE</u> the Effective Begin Date (Usually October 1).
S060	Old Diagnosis Code is reported <u>AFTER</u> the Effective End Date (Usually September 30).
S061	Expected Source of Payment: For Payer categories 01 thru 06 reported with Type of Coverage 1, the Plan Code cannot be blank or all zeroes.
S062	Expected Source of Payment: Do not report a Plan Code with Type of Coverage '0', '2' or '3'. (Example: 01 3 0000)
S063	Expected Source of Payment: Type of Coverage cannot be "0" for Payer categories 01 through 06. It must be reported as '1', '2', or '3'. (Example: 01 2 0000)
S064	Expected Source of Payment: For Payer categories 07, 08, and 09, Plan Code and Type of Coverage must be reported as all zeroes or left blank. (Example: 07 0 0000)
S071	Source of Admission-Route of Admission is reported as "Your ED", but your hospital is <u>not licensed</u> for Emergency Department Services.
S072	Expected Source of Payment: Worker's Compensation is illogical with age of patient (under 15 years old).
S073	Admission Date is not a reasonable date. Example: The Admission Date is more than 20 years before the Discharge Date.
S074	Principal Procedure Date is not a reasonable date. Example: The Principal Procedure Date is more than 20 years before the Discharge Date.

<b>Critical Standard Edit Flag</b>	<b>Description</b>
S075	Other Procedure Date is not a reasonable date. Example: The Other Procedure Date is more than 20 years before the Discharge Date.
S076	Type of Care is illogical with Type of Admission "Newborn".
S080	Date of Birth is after the Discharge Date.
S081	Date of Birth is after the Principal Procedure Date.
S082	Date of Birth is after Other Procedure Date(s).
S083	Type of Admission indicates Newborn with an illogical Source of Admission. The Type of Admission is reported as '4', but Source of Admission is not '5' (born in the hospital) or '6' (born outside of this hospital).
S084	Date of Birth and Admit Date are the same, but Type of Admission is not equal to '4' (Newborn).
S086	Sex is illogical with Female Principal Diagnosis Code.
S087	Sex is illogical with Male Other Diagnoses Code.
S088	Sex is illogical with Female Other Diagnoses Code.
S089	Sex is illogical with Male Principal Procedure Code.
S090	Sex is illogical with Female Principal Procedure Code.
S091	Sex is illogical with Male Other Procedure Code.
S092	Sex is illogical with Female Other Procedure Code.
S097	Other Procedure Date is after Discharge Date.
S099	Date of Birth and the Admission Date are not the same, but Source of Admission and Type of Admission indicates a Newborn born in the hospital.
S103	Duplicate External Cause Codes reported.
S105	Age is illogical with Other Diagnoses Code(s).
S106	Age is illogical with Principal Procedure Code.
S107	Age is illogical with Other Procedure(s).
S109	Age is illogical with External Cause Code(s).
S110	Other Procedure Date is more than three days <u>before</u> the Admission Date.
S114	New Procedure Code is reported <u>BEFORE</u> the Effective Begin Date (Usually October 1).
S116	New External Cause Code is reported <u>BEFORE</u> the Effective Begin Date (Usually October 1).
S119	Old Procedure Code is reported <u>AFTER</u> the Effective End Date (Usually September 30).
S121	Old External Cause Code is reported <u>AFTER</u> the Effective End Date (Usually September 30).
S129	Principal Diagnosis code is exempt, but POA Indicator is not blank.
S130	Other Diagnosis code is exempt, but POA Indicator is not blank.
S132	External Cause Code is exempt, but POA Indicator is not blank.

<b>Critical Standard Edit Flag</b>	<b>Description</b>
S138	The PLS Code or language reported is <u>AFTER</u> its removal from HCAI Regulations.
S139	Charge per Day is greater than \$450,000.
S140	The Source of Admission is an illogical combination with Route – Another ED.
S141	The Source of Admission is an illogical combination on a Newborn record: BORN INSIDE THIS HOSPITAL – ANOTHER ED.
S142	Homelessness Indicator is illogical with Principal Diagnosis Code.
S143	Homelessness Indicator is illogical with Other Diagnosis Code.
S144	Duplicate Race Codes reported.
S145	The Races reported are an illogical combination.
S147	Illogical combination. Indicate Country Code for those who reside outside the U.S.

**WARNING (SW) Non-Critical Flags**

<b>Warning Edit Flag</b>	<b>Description</b>
SW01	Partial Date of Birth reported. Only the Birth Year is reported for this patient.
SW02	Partial ZIP Code.
SW03	The Patient Length of Stay is greater than 180 days. Verify the Admission Date and Discharge Date.
SW04	The Type of Admission is “Elective”, but the Source of Admission indicates that the patient was admitted through your ED (Source of Admission-Route of Admission).  This is an illogical combination.
SW05	Principal Diagnosis: HIV test result reported.
SW06	Other Diagnosis: HIV test result reported.
SW07	Expected Source of Payment: Medicare is reported with an Unknown Social Security Number.
SW11	Based on the length of stay, the Charge per Day is less than \$100 or greater than \$150,000. Excludes records with SOA-Your ER <b>and</b> Patient Disposition 20 (Expired).
SW12	Prehospital Care and Resuscitation (DNR): DNR reported as “YES” is unlikely for Psychiatric, Chemical Dependency, or Physical Rehabilitation Type of Care.
SW14	Questionable PLS write-in reported. Please review and verify the Preferred Language Spoken.
SW16	Partial Patient Address reported. Street Address, City, State, and/or ZIP Code is/are blank.
SW17	Partial Patient Address reported. ZIP Code is valid and Homelessness Indicator equals N or U, but Street Address, City, and/or State is/are blank
SW18	Invalid City.

## VIII RE-ADMISSION EDIT PROGRAM

### OVERVIEW

The Re-Admission Edit Program edits for discrepancies between records for patients who had more than one inpatient stay within the Report Period. The records are sorted by Social Security Number in order to group together all inpatient stays for the same patient. Using the first record as the “base value”, the data is then edited for discrepancies in Date of Birth, Sex, Race, and ZIP Code reported for the same patient. The Re-Admission Edits also identify possible errors in transfers between types of care within the facility; and admits from and discharges to sources outside the facility.

**Error Tolerance Level (ETL):** 2% of records with one or more Critical Re-Admission Edit flags, based on the total records reported. All errors in a record are counted as one (1) error.

### **How do I know if my data failed the Re-Admission Edit Program?**

Check the “Report Validation Summary” to see if your data passed or failed the Re-Admission Edits. The Summary will display either “Pass” or “Fail” and the number and percent of records with a “K” flag.

To access this Summary: Click on the appropriate data type and report period on the Home screen.

### DEFINITIONS AND REPORTS

#### **Critical Re-Admission (K) Edit Flag**

A “K” flag followed by a 3-digit number identifies a Critical Re-Admission Edit. Critical K-Flags are applied towards the ETL. If there are more than 2% of records with one or more K-flags, then the data will FAIL the Re-Admission Edit Validation.

#### **Re-Admission Warning (KW) Flag (Non-Critical Error)**

A “KW” flag, followed by a 2-digit number, identifies a Warning Re-Admission Edit. KW-flags will not cause the data to be rejected since they are not applied towards the ETL. These warning flags are provided to alert the facility to review possible errors in the data.

#### **Re-Admission Summary Report**

This report provides a breakdown of the number and type of K and KW flags identified in the data. Another summary in this report displays the type and number of K flags by data element. Use this report to make sure that all errors are located and reviewed or corrected within each record.

To access this report: From the “Report Validation Summary” of the Report Dashboard, click on “Summary” in the Re-Admission Edits section. You can print and/or save this report.

#### **Re-Admission Edit Detail Report**

This report displays all records that have one or more K or KW flags. The records are sorted by Social Security Number and then by Discharge Date, within each group of SSN's.

To access this report: From the “Re-Admission Edit Summary Report”, click on the type of flag (Critical or Warning), data element, or individual edit flag. These reports are filtered based on your selection. To view all records with Re-Admission Edit flags, click on “Record Listing” in the Menu to be directed to the Record Listing page. From this page, click on “Re-Admission Edit Detail” in the Menu. You can print and/or save these reports.

## CRITICAL RE-ADMISSION EDIT FLAGS AND DESCRIPTIONS

<b>Critical Re-Admission Edit Flag</b>	<b>Description</b>															
K002	<p>Date of Birth does not match with the first record. Date of Birth on subsequent records for the same patient does not match the Date of Birth reported on the first record.</p> <p>Example:</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 30%;">SSN</td> <td style="width: 30%;">DOB</td> <td style="width: 40%;"></td> </tr> <tr> <td>Same</td> <td>03-11-1952</td> <td>K002 (First Record)</td> </tr> <tr> <td>Same</td> <td>03-11-1952</td> <td></td> </tr> <tr> <td>Same</td> <td>05-11-1952</td> <td>K002</td> </tr> <tr> <td>Same</td> <td>03-11-1952</td> <td></td> </tr> </table>	SSN	DOB		Same	03-11-1952	K002 (First Record)	Same	03-11-1952		Same	05-11-1952	K002	Same	03-11-1952
