Linking the Datasets

A unique WAC Increase Report is identified by its National Drug Code (NDC) and the effective date of its current WAC increase. Both these data elements are provided in each data set to link the records of each report in the data sets.

Each record (Excel row) in the *Prescription Drugs WAC Increases* data set only includes the information from a single WAC Increase Report, as identified by the report's NDC and WAC Effective Date. Each record (Excel row) in the *Prescription Drugs WAC Increase – 5 Year History* data set only includes information of a single WAC increase; but more than one WAC increase (record) can be associated with one WAC Increase Report, as identified by the NDC and WAC Effective Date (Current) of a given report.

Prescription Drugs WAC Increases

NDC	WAC Effective Date
62856072430	20190619
49884027082	20190104
52244003060	20190104

Prescription Drugs WAC Increases – 5 Year History

NDC	WAC Effective Date (Current)	WAC Effective Date (5-Year History)
62856072430	20190319	20190319
62856072430	20190319	20180701
62856072430	20190319	20180101
62856072430	20190319	20170823
62856072430	20190319	20140823
49884027082	20190104	20190104
49884027082	20190104	20170104
49884027082	20190104	20150104
